Cali Shai Bergandi (I Lack Eyes)

Posted on 2021, November, 16 by foxblog

This is shocking interview even by the standards of illuminati abuse…

It will take me too long to extract information from it, but I have included the autotranscript and there can be subtitles on the screen… It takes courage to give your story like Cali (Claire Walker) has done and also congratulations to Emma on having done impressive interviews for a year now…

Updated 2026 Sept 21 The bitchute links are down as well now. As I no longer support Emma due to her attacking survivors and advocates, and being gatekeeper and accessory to harm for her husband David Hall aka Grey Area Monarch, I have not replaced the links, the transcripts are here though.

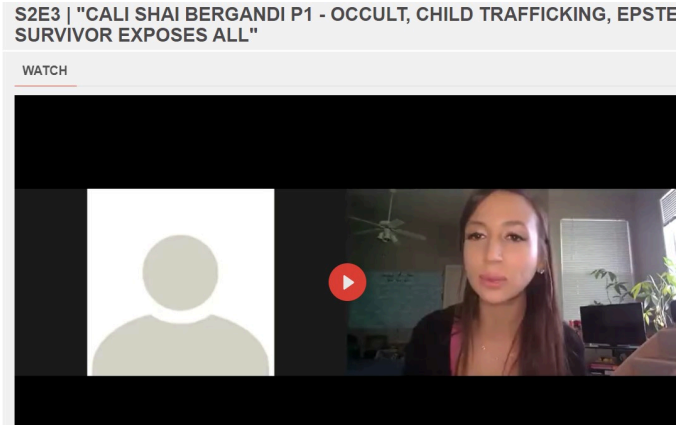

I regret helping Emma, and putting Claire in contact with her, especially as Claire was subsequently jailed. Was it inevitable if Claire told her story as payback from her family? Did Emma take insufficient precautions with a vulnerable survivor and it set off destructive programming?

Unfortunately it is one of several jailings, disappearances and surrounding Emma and her husband David.

This interview was the first to propel Emma to a much wider audience.

My links are on http://own.page/foxblog

[1b] 2021 Nov 14 Bitchute The Imagination Podcast S2E3 *"Cali Shai Bergandi P1 – Occult, Child Trafficking, Epstein, NASA & SRA Survivor Exposes ALL"* https://www.bitchute.com/video/1bXDgubZtixo/ Dead Link

LETS BREAK THE INTERNET! This story is going to twist and turn and bend your mind in ways you won't be expecting and you won't see the world the same after listening to Part 1 of this series featuring elite child sex trafficking, NASA, SRA, occult survivor, whistleblower, and SO much more, Cali Shai Bergandi. This is her first time speaking publicly about her life experiences and I encourage you all to give her your full attention as you take in what she is exposing… Cali's story is so complex. So complex that it was hard to even know where to begin. So, we started at the beginning and are going to compile a few episodes for you to take in the enormity of her personal experiences, allegations, name drops, and information she is exposing. Born into a high level occultic family, Cali's birth mother sold her to the elite before she was even born as part of the breeder programs that are a feature of sa-tanic cults and her father functioned as a sa-tanic serial killer in the dark and as a charming businessman working in the fruit business by day. And this is just the beginning of the enormous

rabbit hold Cali is going to take us down over the next couple weeks… In this episode, we discuss Cali's 'upbringing' (aka: abuse), and we also dive into some experiences that we'll be covering more in depth on future episodes including personal experiences with Ep-stein, NASA child experiments, The Royal Family, MK U-ltra, being trafficked to sitting Presidents of the past and present, the FL fruit industry and political landscape (including the trafficking system), and SO much more than I can fit into this caption. I really encourage you to stop what you're doing and listen. This episode and Cali's words will undoubtedly awaken you to things you have not yet heard about, connect dots and connections that will bring 'Aha!' moments, take your breath away and leave you speechless (which you can see happen to me many times during this recording), and inspire you all at once to DO something now that you know what you know. Cali is a truther and her story is important. It would mean the world to us if you could help us get this story out by sharing far and wide, commenting, subscribing, and 'liking' this video. It's time to make survivors the new MSM and look to them as authorities on answering the many questions we have about the world so we can work together to give survivors like Cali the justice they deserve and create a better future for the next generations of children.

Auto Transcript

what's up you guys welcome to the imagination i'm your host emma and today i am really honored to bring to you a guest that i actually met your mutual friend kathy fox who if you guys are in kind of the human trafficking

child abuse world of research you have probably come across her she actually introduced me to a survivor that i connected with who agreed to come on in her story when i say it blows me away i mean all the stories that i've had and introduced to you guys have blown me away but i think kaylie's story is going to really open up your eyes to some things that we haven't talked about and it's also going to elaborate on a lot of topics that we have talked about so kaylee schabergandy is joining us today and she is an occult survivor a child trafficking survivor and she was actually born into um the occult specifically for trafficking and she has a very very high level and elite story that is going to be a little bit different um than some of the things that you guys might have heard on here so far um please put down anything that that you're doing i would love if you guys would all pay attention to kaylee's story i think everybody that's listening you're going to take a lot from this we're going to chip away at her story we probably won't cover um even close to all of it in this episode so i hope that you guys hang around and really follow the the following episodes that we're gonna have after this but really pay attention take notes listen listen listen listen share subscribe and get the word out on this story because this is in my opinion this is one of the biggest and most important stories that i think i'll ever have on this podcast so kaylee thank you so much for being here with me today yeah thank you i appreciate you coming on i know i know the world is crazy right now so i appreciate you taking this time um so i'd love to start i guess at the beginning of your story i know that there's so much that we can leave through i was just telling you before we jumped on i could probably talk to you for 10 years and we'd still just be scratching the iceberg the tip of the iceberg but i'd love for people to to learn a little bit about what that means when i said um that you were born into this program and for you to word that in your own words because it's still something i'm learning about and these breeding programs and these these occult programs um and trafficking programs especially government oriented they're things that a lot of people don't hear about much and i'd love for you to maybe start from the very beginning and like i said we'll just we'll chip away at it um and i'll intervene with questions um but i'd love for you to just give a little intro on the beginning of your story and we'll just work towards the present well i was born into a satanic cult family um who practiced occultism and satanism and they i think that they were into some my grandfather had ties to nasa he worked at german um so they were doing all kinds of science experimentation things through through nasa programs and i believe that my mom was a breeder so they bred her and they were taking eggs and embryo and

putting them in you know and various women and you know i know jeffrey epstein back then was doing this project um wanting to feed the human race with his dna and all this crazy stuff was going on and um they had these connections so they were they were you know breeding my mom and basically i was born for trafficking purposes so i was born to be soldas a small childat three okay i read something i think one thing before about what you said about jeffrey epstein i totally forgot about it until you just said that so that's actually true i think it was an immediate traffic yeah i was traffic to jeffrey out of um my mom had been married before i was born actually to a man named gary gary kimball of brevard [[broward]county titusville in florida uh which was about an hour and a half from bureau where we lived and i've known gary my whole life even though it was my mom's ex-husband i grew up around gary and being flown out of his airport he owns a private airport in brevard county that i would be flown out of jeffrey epstein used to fly in and out of there and back then um you know they they controlled all the air traffic control and stuff in and out of there so they could get in and out of there pretty inconspicuously wow so he actually did say that about i want to basically spread my seed to all these girls and um so that's true that's disgusting um into all kinds of stuff i believe and a lot of people i don't think know this but i have seen jeffrey get very severely ritually abused i have seen him strapped to chairs with these straps across his face like a gas mask like and being tortured literally and screaming and yelling and i'm just this little girl and they're forcing me to watch this type of stuff and and it was jeffrey um but he became a handler they they manufactured him as well and um he he became a handler and he was basically a fall guy and a front guy for them i mean he was controlled too and i don't think a lot of people realize that you know everybody looks at jeffrey because of the mainstream media pushing this narrative that he's this monster but he was used as well and he he was used as a fall guy essentially but i mean they were doing all kinds of things to him um i believe that something i mean if i remember correctly that something happened to his jaw like an attempted dismemberment so he had like jaw problems upper jaw problems where they were taking these teeth out of boys and children and using them for um um sexual purposes you know or oral sex they would knock your teeth out so so you you know could be used for oral sex purposes all kinds of stuff like that so i think they did that stuff to jeffrey um they actually took my eye teeth out when i was an infant they took the the pods the teeth pods out and they grew my teeth in a lab so i ended up with demon teeth they call them demon teeth they take your eye teeth

which correlates with my name i like eyes kaylie shea backwards as i lack eyes they took my eye teeth which are there's something about the eye teeth being connected to a nerve to the back of your eyes or something like thatand i and i was um you know blindfolded and hoodwinked they call it for most of my abuse so i wouldn't be able to tell like who was raping me during gang rape so i wouldn't be able to look out the window of cars so i couldn't tell like where i was being taken or by whom and this all started whenever you were born basically do you yeah i was born into the cult so i mean from the time i was born um they start using you right away for for you know practices and like i said they took my teeth buds before my teeth even came in so they took those and grew them in the lab um the women start grooming the babies from from infancy um i've seen it done you know during diaper changes and they'll finger the babies to get them used to it get them used to the sexual abuse so that's what the women in my family dooh my gosh that sounds horrific and so children it's like they're so i i was invited to a luncheon my cousin mrsari grazie lindner married into this very wealthy family after being trafficked most of her life by by our family as well they were all into it and um and we were invited to a luncheon over at the vero beach hotel she used to fly the family's private jet down to vero every couple months and stay at the vera beach hotel and have everybody come to the hotel and do lunch with her because we didn't get to see her much when she got married and moved away and she had a nanny with her two little girls at the pool and i'm sitting there by the pool and the kids are in the pool she gets the baby out of the pool and she's changing the baby and she starts fingering the baby and i start screaming i started screaming at the pool and then a needle was stuck in my leg by another family member and i was drugged silenced we're trying to get helpterrific and i can't imagine how that impacts a child like they're not just grooming the infant but they bloom you to essentially just keep your mouth shut look the other way whenever you see anything wrong happening right and that's essentially what most of the people in my family do and i'm i'm like the black sheep you know because i have been hoodwinked for a lot of this stuff my family has ritually abused me my entire life with a blindfold onso everybody else watches but i don't so when i actually visually am able to see stuff like that i call it out and when i do i'm usually silenced by either being drugged or beat or raped myself you know when is your earliest memory that you had to recall on as far as being a child yeah and like understanding i know the abuse obviously starts whenever you're born what age do they start ritually abusing and kind of increasing that with these children

when i was um i was going to first church of god is what it's called it's on the corner of 20th avenue and 8th street in vero beach florida and i was being taken there um i'm not sure if that was a daycare that was into the occult or not because i've been to daycares that are um owned by occult members and then abused in daycares and stuff too my family owned daycares in indian river county that they were using for child prostitution and trafficking purposes um they had they had their own little school bus and stuff like that but my first memory um was basically going to that first church of god and going out of class because i had cramps i didn't you know i was like three or four years old in daycare and i don't um i couldn't identify what was wrong with me i just went to the toilet and i sat on the toilet and had blood in my underwear and i didn't know it was blood i thought it was like poop or something and i'm going i need help and um i sat there on the toilet at first church of god for like hours until a teacher finally came looking for me and i believe dcf was called at that point so it did create a riff for them for a while and i was taken out of that daycare and then put into another daycare where they could abuse me and get away with it but that that's my first um memory you know um of being abused was that particular incident where i sat on that toilet forever you know not knowing what was going on or what was happening to meand so your family what did they do because i know obviously in a call um how did they show up in society what did your parents do my mother worked in banking um they had a lot of mob ties a lot of ties to biker gangs and other types of brotherhoods also that you know it's all one and the same that's what they say you know it's every you know it's all one in the same so they umshe worked in banking she was a plant basically to uh get obtain account information for wealthy people and target wealthy people in and around indian river county her and a lot of her friends renee griffith pennythis lady named april glover worked at the bank for her she was a younger girl but they were all targeting wealthy families in vero and they were used in the banking system to obtain account information so she was like a teller and stuff like that at the bank but also getting paid outside of the bank job she had by the network for getting getting them you know the account information so they were they were kind of gangster she had a lot of friends like that darlene dollins heckman renee griffith i grew up around these women being raped by their men and their families and their husbands would participate in this stuff you know i wasn't allowed to have friends that weren't in the cult so i was raped by all my friends fathers um everywhere they took me they knew somebody um restaurants restaurant owners banks bankers bakeries um the bank president that

she worked at first american type or it was not first american title was first american bank alex mack william owned the bank we used to call him mr mack and after hours they would go up front and lock the door of the bank at five o'clock and then bring me into his office that he would rape me on the desk in his office at the bank these are bank presidents these are restaurant owners these are you know people tied into the network they incur in the in the cult they encourage you to get into you know a position of power or uh politics or law enforcement or whatever so a lot of these people chose to own businesses so that they can incorporate and launder trafficking funds basically through their companies so a lot of people like my family they open daycares they opened um hair salons because hair salons were you know they were a cheap easy license to get and they were affordable to openso my stepmom and my aunt both did hair and owned hair salons that we were prostituted out of our whole life and then my mom was doing the banking thing until i got to be in about high school probably and then she quit her banking job married a man that was 18 years younger than her and became a truck driver so she was a runner after that meaning that they traffic children through the trucking industry yeah she trafficked me i've been on the road with her before and i've been raped and take into places and drugged and i've been in the truck with her as a matter of fact um i don't know what she was doing or what the hell she was hauling but i've been in the truck with her um across the country where she her her truck was being followed by secret service and uh d.o.t and i'm going you know i wake up from you know in the bunk and i'm going what the hell is going on like why are we being followed you know what the hell are you hauling she's going i don't know i mean she was basically just paid to drive she didn't even know what the hell she was hauling half the time it could have been a box full of human remains for all we knowand honestly that's a big part of the problem in society is the way that human traffickers and rapists and even occult members are marketed or shown to society you see for example people imagine a satanist to look like a goth right all black hair and it's super obvious these people are your hairdressers they're your daycare owners they're people that you trust your kids with my family is very well liked in the community very well liked there was about 175 people that showed up at my dad's uh celebration of life that we had for him after he died or disappeared or whatever he did in 2016 i mean there's a lot of people um that know them and they don't but they don't really know them you know i mean it's almost like they have this front i mean there's there's people that know what they do because they practice with them but most of the

community just knows them as normal regular nice guys and that's the scary part is that is exactly what they look like they don't look like these creepy um you know crackheads that you see on tv those are kind of like one-off cases you know i know that that happens where random people have a mental disease or just there's something wrong with them and they go kidnap a kid or they get into this on a lower level but really it's the stereotype that we need to get out of people's heads is what they show on the news and how they portray at movies that these are very obvious people in society that you could pick out and say oh that looks like a rapist or oh that looks like a satanist like these are normal people like you said that just have normal jobs that we're associating with every single day i grew up around doctors and physicians of all kinds that i have been ritually abused by and tortured by and labs i mean i was raped and used for torture and babies i was a breeder from the age of eight to fourteen every year they would impregnate me and they always took the babies at six months they never let me carry full terms so i never got super big but i was always made to wear bigger clothes to cover myself so nobody knew um you know that it was a big secret but they would take the babies prematurely at about six months and they were either being used for trafficking purposes or killed in sacrifices you know ceremonies so several of mine were were killed and my father uh strangled one in the back bedroom that was born and then uh forced us to watch him bury it in the backyardwere you aware that this stuff was happening as a child or did they dissociate you for these memories and you had recollections you had dissociative disorder so i do dissociate from my body during violent rape and torture um so i'm i'm present but not and i can i can kind of control it in a sense where i can kind of tune back into my body if i need to um so i i am like i said i'm present but i'm not so i do remember these things but um i was heavily drugged for the pregnancies especially during the time of birth because they would induce me or take the baby in an unnatural way so i was heavily drugged for the births most of the time and um i would be woken up because they have anecdotes obviously for all the drugs that they have and i would be woken up and i would be allowed to hold the baby um they have pictures of me with these babies and then they would be taken and then i was just rest in recovery after that so i spent a lot of my life recovering from violent rape torture and attempted murdermultiple child you know pregnancies and just being beat on did your family have you participate in society also normally did you go to school normally play sports things like that i did i was trafficked through this school system in indian river county so there were teachers school board

members principals um other other people like that in the network that that you know worked at these schools ran these schools and i would be taken out of class like literally signed out of class men would come and get me and i would be raped and then brought back to class and picked up from school like every other kid and teachers were aware of this there were teachers participating diane hawkins she is the sister of kevin hawkins kevin hawkins and tim rose i was a child bride to run an enterprise in indian river county and they're we call them grave diggers you know i grew up in the death business my dad worked for fmc which was food machinery and chemicals so he worked you know around a lot of grove owners and in the fruit business and so did they they were contractors you know there was all kind of one in the same there and umi don't remember where i was going with that sorry i just got a dream oh it's okay you were we were talking about playing sports and going to school yeah so yeah i was allowed to go to school but i was still being used through the school district i was used everywhere i went everywhere i went i couldn't be taken to a restaurant without being bent over a table in a kitchen or a counter you know and raped by the men that are in the cult i mean i went you know banks bakeries ferrara's bakery i would be raped there at scampi grill um vincent's pizza and vero i've been gang-draped around you know there i you know here i am thinking i'm going to dinner with my family and then all of a sudden somebody comes up behind me makes me get out of my chair bends me over the table and rapes me in front of my entire family everybody sits there and doesn't do a damn thing about itthey just watchso a lot of times that's what's happened to me but yeah i mean like i said i was going to school but i was also being used at school by teachers by principals um when i got up into high school i was being used a lot there um or you know taken by a teacher and shoved into a bathroom and raped or taken over to um mr carroll's office and raped in his office there were people like liz santiago in the office of indian river charter high school that her son wanted to get into the music industry and they offered her family like this music deal for her son but she had to participate in this occult practice and let these men rape these certain girls that went to my high school there was i mean they put us all on a lot a lot of us all in the same schools really yeah yeah it's not how that normally works in everywhere in the country it's the counties that i i mean were indian river putnam county brevard uh broward you know all up and down the east coast was kind of like their territory but yeah i do believe that that's how they do it they they get you know they get a network and and we were basically in the john walsh network basically in indian

river county which is the head of the operationin florida that's where all of this was taking place and still is right so is that is florida indian river charter school those are schools that i went to and my aunt who worked in the daycare that my grandmother owned she's a school teacher at oslo middle school now she teaches 7th grade she's been there for 25 years and she's a damn traffickerthey would rape kids in the daycare my the men in my family and other men in the cult would come into the daycare when we were kids and act as maintenance men and just snatch a kid take them in the bathroom and rape themthey hunt they're predators you know and they kind of hone that behavior and they actually you know practice that they get good at it and they feel like they're good at it you know so they want to go like they go on these hunts so so i i think it's important for people to know anybody that says that they hunt you really need to be you know pay attention to the people that say they hunt because these predators also hunt but they're not hunting animals they're hunting women and children like animals boys too it doesn't matter they just go on hunts i've been on hunts with my family or they're preying on other peoplewhat is that process or what is for because that's something too a lot of people don't know about that and i don't think we've talked about that yet at all on the podcast would you be able to explain what those huns are my father was a serial killer he was a gravedigger and a transporter of human remains for the cult and we grew up around he worked in packing houses in the fruit business so he was around a lot of um you know plant uh juice plants ocean spray uh natalie's orange juice uh dull citrus you know indian river county at one time was supposedly the number one distributor in the world for grapefruit but i think grapefruit might have been a code word for childrenso you know i would hear a lot of stuff like you know my dad would come over to my grandfather's house and oh how's the fruit business you know they would always refer to it as the fruit business how's the fruit business but they were transporting um corpse and human remains and things like that and buckets of fruit in and out of indian river county because the um you know rotting fruit will attract the black fly like corpse and rotting human remains do so it's easier to transport without getting caught and you might be sitting right next to one of these bucket trucks at a stoplight not even knowingand these trucks travel all around the country i'm guessing because i know even out here in nevada have florida made something you know oranges from florida orange juice whatever it is anywhere you can drive a truck yeahabsolutely you know i would be taken to the plants i would be taken to the heads of operation i would be taken to dull citrus i would be taken

to ocean spray into places like that and then taken down you know i they showed me they would give me tours of the factories and stuff like that a lot of them were pretty neat to be able to see the production the you know the conveyor belts with the fruit being de-stemmed coming down the line and then it goes through washing and then it goes through waxing and and they work on a lot of those machines and stuff like i said um fmc was food machinery and chemicals so they dealt with the food business food industry the machinery that processed food and chemicals so they had you know they were manufacturing all kinds of chemicals even using juiced human remains because they were doing that as part of the occult practice there's rollers on these machines that they were making big enough to put a cadaver through so they would juice fruit and then you know they would juice human remains they were using the juices to manufacture products these products go into different food things for flavoring they go into lip fillers and face fillers they go into a lot of things people can research that but it's important to know i've seen it done those tunnels that i were talking about recently um they actually had turned some of these tunnels into like a juicing track so these cars would these train cars like a little ride at disney would go down these tracks and they're dark and scary down there in these tunnels and i remember being with my handler in one of the cars and there was a train car in front of us and he was raping the girl in front of us and she appeared to be drugged i mean her head was hung low her hair was in her face and when he was done with her he um they basically take like this prod and they prod you in the neck and some of them my handler used to do it to me you would drink the blood right out of my neck so it wasn't like they were putting it in a vial or doing anything like that i mean they would drink it straight from your body so he did that to her in front of us and then when he was done with her corpse he just threw her out on the tracks which those the the tracks on that particular tunnel that i was on and i don't know where it was but there is one that exists still to this day that's running and they they took the train tracks on they put rollers you know just like the packing houses and i'm going oh my god what are they doing down here but there's rollers so once you get stuck in those tracks those train cars come through there all day long and they just juice juice the remains that are left on the track and then they were piped underneath um they were piped to go collect the juice off of the tracks and go into these large tanks so once we got to the end of this track and into the building they took me downstairs where you could actually see every time somebody was juiced upstairs the machine would like purge you know and the juice

would come out into the uh buckets into the big drums so i remember being there and seeing as a little kid and then explaining to me what was happening and i'm going oh my god so every time i saw the the machine purge more juice i would cry because i knew somebody had just dieddid you know i mean it seems like with most of the survivors that i've had already on this show there seems to be certain people that no matter how many times somebody tries to break their spirit which is exactly what they were trying to do to you they never can and there's always something inherently wrong in those people no matter what where other people like your parents it becomes something that they just they participate in and it's nothing to them was this to you like at what age did you start to say wait this i know that this is how my family is operating and i know that this is what they do but this doesn't feel right yeah when did you start to think that because that had to have been hard if you're born into it and that's all you know as long as i can remember i knew it was wrong i knew it was wrong i used to say it to my brother husband handler whatever he is he grew up with me like a brother and then he became my handler um they actually let us stay together and we did get married in the backyard and the satanic ritual therapy sorry i gotta get my dog umi would tell him when i was the little girl and he would rape me i would say you're sick to me or i would say laura i would say to my mom laura he's being sick to me or these guys are sick to me i would just say sick to me i didn't know how to identify what was happening to me but i knew i was sickand they have videos of me saying that things like that you're sick to me walking around after being raped you're sick you're sick i would tell them you're sick to me so i've known all along but it's wrong i hated it i hated it i never understood it i was always so confused why everywhere everywhere i go with you this happens to me i don't understand why this keeps happening you know they would act like they were oblivious sometimes like oh they would just take me over to so and so leave me in his office and then go you know go to the break room go get a snack go get something to eat let them rape me and come back it was just like nothing and i'm going why does this keep happening to me you know i couldn't under i couldn't understand why it kept happening over and over and over and i couldn't stop it and there was no help for me i mean i tried i would try to tell on people who was i going to tell they were all doing it to me they were all doing it to me with my eyes closed so i was thinking something happened to me and these other people are doing this to me i'm trying to tell on them but i'm telling the people that are doing it to me on themselves you know yeah because most of the time while i was being

raped they would put something over my face they would mask me hoodwinked me they called it hoodwink um i put something over my face so that i didn't know who was actually raping me at the time so it made it even harder for me to identify which correlates with the what they were trying to do as far as whatever experiment they were doing with me as with my eyes you know lacking eyes not having eyesmy name backwards i like eyes they took my eye teeth so a lot of those things and for people listening we'll all have her explain how to find her but that's her twitter name is ilock eyes so if you guys are on your phone right now or if you have access to it go follow her she she's really disclosing a lot on twitter too so you'll definitely want to keep keep in touch with her there especially um after you guys listen to this episode now kaylee why i mean for people who have kind of looked into this i think um they might just know that child abuse is a big part of occult systems and human trafficking systems but why is that how did child abuse get so embedded into these cult systems and why is that so important to them well the other i i think the i think that it really boils down to occultism being the problem if you could just look at occultism as a brotherhood you know simply it's brotherhood and trafficking of any kind all over the world would not exist without this brotherhood so the roots of the issue and i tell people all the time you have to get to the roots if there's something that you want to stop or fix or transform or change you have to get to the roots of the issue and the roots of these trafficking issues are occultism so if you start researching occultism the history of occultism in the united states how occultism became legal in the united states when the church of scientology became a legal church entity and tax exempt in 78 which was right before the uh ritual sacrifice of adam walsh so right before that happened they were bringing occultism into the united states under the guise of a religion so they hide behind this freedom of religion act that this is a religion now because they got it they had enough people you know where they got scientology named as a church in the united states in 1978 i believe it was it's on my page um and then after that it was basically like they they had free reign to do whatever they want because they could hide under the freedom of religion act if you go back and look at interviews with jeffrey epstein and his previous cases that's one of his main escapes is i'm not from this country and that's against my beliefs and that's not what i believe and you know those were all the excuses that he used to kind of skate around the law for practicing what he practicesand so because it's legal it's something that also society probably doesn't understand to look into women that's the thing occultism in the united states is not legal

but that's exactly what they're doing um it's not legal freedom of religion is legal occultism is not but if you look at uh the origins of scientology scientology clearly states it's a cult it's not a religion but it's named as a religion in america so that they could get around the law and a lot of this was brought into the states by people like sir richard branson who was knighted by the royal family and ed borsage who owns a private island right next to branson that i've been trafficked to my whole life my my family lives in the bahamas four months out of the year on compass k which is uh they call it tucker's island tucker rowley he comes up to vero and stays he's the uh he owns the island he stays with them in vero when he comes to vero um his and and here's you know they're all connected so tucker gets his shirts and other material printed by a printing company in vero beach that's also owned by uh my occult friends tara gianna um adams and um what's his name garrett adams people that i've been trafficked to throughout my life their their families were home builders and contractors in university they own a printing company now they print t-shirts for tucker my aunt and uncle pick up the t-shirts take them down to the bahamas and they stay down there four months out of the year so yeahhow does this brotherhood work as far as how it's structured i know you've talked about all the way from school teachers all the way up to government um how how is the occult i mean the school system is government i mean it's all state it's all government and i was trapped through the government i was a born government sexly for the white house the fbi local law enforcement masonic freemasonry cop gangs um there's a free uhkayla your phone's cutting out a little bitoh no we lost herokay we got her back all right sorry i don't know what happened it is okay that's happened so many times on here and i'm like i had to change my vpn that's crazy wowyeah this is like it gets really weird sometimes yeah it's getting a little hairy huh yes okay there we go that now this is working there's a lot of people that don't want me talking about this and i understand that i think people need to understand and realize i am a very targeted individualand i'm really sorry that that interrupted you too i know that you were talking about cops and it happened to shut off um which is also ironic so hopefully it was just reception and nobody's messing with it um but please everybody say say some prayers also while you're listening um just for for kaylee's protection too because she is taking a big big risk coming on here and talking about this um so i'm trying to to think where it cut off right before it hung up i don't remember what i was saying um i think we were talking oh i know i touched you you're like wait i'm still talking we were talking about the brotherhood and just

how the occult structured a little bit um i forget exactly where it cut you off on but i know you were starting to talk about how the structure of all of this worksuh with the brotherhood i was brought up and freeman i basically i basically didn't have parents my mom pawned me off on on men various men i was sold to married to as a child bride taken overseas to foreign countries where it was uh legalized where they don't have laws on child marriages a lot of um people don't realize i i was trafficked a lot by navy men there's a lot of a lot of men in the family and in the cult that were associated with the navy and the military armed forces um but specifically the navy because there are no laws in international waters so they can get away with just about anything out there and um and overseas you know in foreign countries they have different laws on child marriages and child rape and abuse and stuff like that so they were taking me to foreign countries marrying me to men but i wasn't just being used for for sex um you know be forced to live with them for months at a time and their families their kids would get up like normal kids and go to school and i would be stuck in the room i wasn't allowed to go to school for months at a time i wasn't fed for days at a time i was beat and raped all day just used uh for sex when i was with these men um but that's how they were doing it and like i said i wasn't just used being used for sex i was being used for my identity so every time my identity changed which was multiple times i have several aliases some of my known aliases are claire j cooper claire j walker and sarah bernhardt and uh bernhardt because i would cry during rape so they would call me sarah bernhardt and um there's a few more that i that i can remember but i know there's more than that um but they're using my identity and that's basically to traffic uh funds offshore to hide uh laundered funds and uh trafficking funds and various accounts in my name that are being kept from me offshore um and and corporations likely you know overseas so i mean they're using children not just for sexual purposes they're using them for their identity they're using them for science experimentation i was sold to nasa and used in nasa programs put in simulators um where i was forced to stay in a similar later for uh weeks at a time they were experimenting on the different you know gravitational forces and things like that and how it would affect a child um they were doing different experiments on me um in these capsules you know there was zero gravity so you're floating around the air if you pee you pee in the air you catch it in a bag crazy stuff like that a lot a lot of that probing um they would probe you in your orifices with these pure crystal rods you know those like anal thermometers that they use mostly on like animals or babies or whatever like they were

taking pure crystal rods like that to obtain um you know cells and things like that with the crystals and then they were flying them in space capsules into space and growing them in labs and experimenting with all these different cells so i know my cells have like been in spacedid you come across other children or did they isolate you for these um i'm assuming that there's other children that they've used in these experiments uh yeah i was with in particular on the nasa trips i was with my um my handler my brother who became my handler which i don't think he was my biological brother but i used to call him bobby you know and then i then i called him husband at like 10 10 years old he became my husband when i was 10 he was eight years older than me eight to ten years older than me ish so they always married the boys to the younger girls to groom themfor people that the word handler um i know a lot of people have heard that what exactly is a handler for people who are either new or who have heard of it but don't understand what that means um i mean he handled me so he he handled um everything he accompanied me on trips he escorted me on trips uh to and from and would get me ready uh for these men and take me to them on private jets so i would be sitting with him on the plane and then he would you know put me in my nightgown or whatever i was forced to wear a white t-shirt a lot as some it was symbolic of a child bride and also so that men could identify me when my parents met them in public places to identify me um so i was always in like a white t-shirt so he would tell me you know on the plane once we got boarded you know go get your go get your t-shirt on so i he would take me to the bathroom and get my t-shirt on and you you don't have any clothes on underneath your t-shirt it's just the t-shirt and then i would be taken to you know up front to the guys that were on the plane you know and used for sexis florida in particular important to the system or is that just one of many places that oh i think it's one of many places but i think it's a huge hub yes absolutely florida is a peninsula there's water on three sides and you can get anywhere in the world from florida they have international airports in jacksonville and miami they just made the regional airport in fort lauderdale an international airport so you can fly internationally right out of lauderdale now clearwater tampa jacksonville orlando um all those places i have been flown out of but mostly out of private estates back then i was flying out of private estates there's uh two subdivisions that were built um in indian river county one is called aerodrome and the other one is called the flying ranches and there are uh private aircraft owners that live there they're all five to ten anchor traps and they have their own private airplane hangers there w ith a actual landing strip right behind

the houses in the subdivision so you can land your plane and park it in your hangar right there at your property so a lot of the i was flown out of private estates like that um and the private airports you know that i i named earlier gary kimball's private airport in uh brevard county titusville he was some heir to a nasa executive's fortune and my mom had married him so that's their connection to nasa they were tied into nasa a lot of these guys don't have you know jesus in their life and they believe in science they don't believe in god and they um you know they're just into all this crazy manipulation andscience but in torture and violent rape and bestiality and porn and uh back then porn was really get the porn industry was really getting big back in the 80s and 90s it started you know coming out you know and just being kind of like a like a normal practice when it was unheard of before that but in the 80s or 90s when porn started to get big my parents were very sexual getting into porn wanting to film their own porn and stuff like that and using us and porn as well um through these programs like uh disney you know i would busch gardens i was raped and trafficked to peter bush he had an estate in vera beach and they are um the bush family busch gardens bush beer um they own theme parks you know they own huge conglomerates that are involved in these type of thingsand this was do uh the spelling of that since it's different than the the political family that that we've seen you had made a comment on twitter that that was actually a grammar mistake that they just kept with busch gardens and with the bush family the president because i was being trafficked to the white house by fbi on air force one to the white house during the bush administration i was tracked to clinton i've been trafficked to all the presidents since i was bornhow far back does this go did this start with a certain administration and it's just continued has this always been embedded since america for me i'm not sure um i'm not sure but i know that i know that it became rampant in the united states when science scientology was like a turning point i think for the occult here and the occult practices here and being able to get away with more um through the church of scientology and being able to use that as you know a way around the wall so is something technology basically a front and cover for everything else or is scientology actually its own type of thing as they market it well it's not a church they call it the church of scientology but it's not a church it's not a religion it is a cult and there are members that have left that are speaking out but they have their own police force they have their own people don't realize that they they handle matters not within like our tribunals and state and court and local authorities they handle everything within you

know so if you're a member of the church and and something happens i mean they they reprimand you they um they they have all that infrastructure in place through the church so they have their own police force basically and these gang stalkers that will silence you if you try to speak out against them and the abuse that you've endured at their hand um i used to be taken to the church a lot as a child uh they have a an entire floor that i was not allowed on that i would sneak into with my brother i don't there was like the fourth and the seventh floor that i was not allowed on for whatever reason but that's where they kept the cadavers and they are practicing on um cadavers you know my brother would be down there practicing surgical and suturing techniques and i would help him on these dead bodies um he's a very highly trained doctor and he's been trained since he was a very young child through this cult so and is that purpose they train within so you're not going to a traditional university and they can keep surgeons on staff and doctors internally without having to go outside yeah sure there are some there are some but there a lot of them are educated by the universities i mean if you ask me universities are just a cult too yeah i know i it's all government right everything owned by government it's tied in somehow and how you were saying that government i'm a born government sex slave yes i was trafficked to the fbi the masonry cop gangs in florida uh the white house and to the royals the royal familyhow did all of this likeit's brotherhood it's connections you know it's it's connection through the church it's connections through nasa it's connections you know they're all they're all connected it's a brotherhood so they they meet each other um at these events you know which can easily be deceived as a dinner party you know so you see in the mainstream media all these people gathering for these events and uh these music awards and all this [___] and basically it's it's an occult practice you know they're initiation ceremonies for people moving up um they're disguised as you know uh concerts you know they're you're taking your children to them and they're basically rituals and ceremonies being done right in plain sight is what they call itand at what age did you say that you you had started being transported and being involved at these experiments and going to the white house um i was three when that started but they didn't get me into the bush admin until i was probably six so i was six years old i was being raped by the president six seven years old um being raped by the president and the white house being kept underground in the tunnels a lot of people don't know there's tunnels underneath the white house there's a whole underground system underneath the continental u.s that goes into mexico and um there's underground tunnels and vaults

down there that i've been taken to my brother was interning at the white house back in the day my handler husband brother whatever so yeah he had access top security clearance to these tunnels and access to the vaults and stuff like that that i would be taken to as a child and my white t-shirt running around the white householdunbelievable such a young thing sometimes for a couple days at a time they keep you heavily drugged and stuff like that and they put you to sleep to and from so you don't really know you know where you're going or where you're coming from or whatever but um yeah they're using gas and stuff like that even in a lot of these theme parks on these rides a lot of people don't know you know whenever you're going on a ride in the in the theme parks and then the spray comes out and hits you you know and it's all just like smoke and fuzz and fire and stuff but they're actually putting gases laughing gases and things like thatat disney and these different theme parks yeah yeah and there's underground um tunnels and there's a whole underground world at disney we used to be taking a fort wilderness busch gardens and yeah disney all over orlando that's saturated in that stuff but we used to be taken underground so underground is when where all the production studios cbs nickelodeon viacom a bunch of those big conglomerates um were involved in in pornography and then they started doing child porn and my parents signed me up for the program i was actually chipped i was probably about five when they shipped me they actually stuck you know what a bang stick is yeah it's like a it's a gun that they use um it's like you know a gun basically at the end of a stick they take they took basically like a kind of a sort of a bang stick type thing they put inserted into my my vagina and and punctured my vaginal wall with a chip so i was chipped for global tracking purposes i think there were 25 kids shipped at the time that i was chipped um and we were each being used for different things butsome people were i don't know why they were doing it either but like some people were to be used for you know six hours a day some people were to be used for an hour a day i was to be used i was one of the 24-hour days so 24 hour a day around the clock i was to be available for sexmen would come in to our apartment at night where we lived in indian river apartments and rape me in my bed wake me up rape me in my bed tell me to go wash and i was expected to go back to sleep because i had school in the morning i had i had a lot of anxiety social anxiety problems like that at school kids thought i was weird um i didn't dress appropriately i wasn't being taken care ofdid you ever tell anybody growing up i wasn't allowed to and to be honest i mean they they would they would they wouldn't teach you properly you know they were manipulating

you so you didn't you know being that young you're trying to figure things out on your own you can't identify so i had problems identifying what was really happening to me umi didn't know that it was raped so i couldn't tell somebody that i was being raped i would tell people they're being mean to me you know and then teachers and other people would be like oh honey you know he loves not being mean you know whatever so it was always really downplayed because i didn't know how to identify it or be able to tell somebody what was happening to me because i didn't knowi was always in a state of confusion discombobulated confusedjust being tossed around wondering why this kept happening to me why am i always in painhow did they decide what children get chose for what like i said i was born for trafficking and these were programs that my parents put me in um so once they signed me over and they sold me it wasn't they didn't have a choice you know my handlers would come and get me sometimes in the middle of the night and rip me out of bed sometimes i was forced to pack a small bag other times i would just be taken um so they could you know you were available to them basically 24 hours a day seven days a week you could be at the store with your mom and have no idea that they're about to show up but they've been trailing you for the last couple days you know and they know where you're at and they just come and take you so i would go with him i grew up around him you know my whole life so i became comfortable with him he was being abused also my handler my brother but he was in the programs too so it was something that we kind of like went into together and once you're sold your soul your parents don't even have a choice you know at times i think there were um they had regrets i remember you know seeing them cry sometimes but they didn't have a choice so you know they they made their choice and that was to sell us and once it was done it was doneare all major institutions especially obviously government entertainmentare all of those intertwined all of them is there anything that you know of that is fighting against this or that is not part of that as far as the major institutions of the world no no and that's the sad part that i think people are going to have a hard time with the most is this is the government these are world leaders these are uh presidents of other countries you know world leaders all around the world participate in this type of stuff it's a huge multi-billion dollar business um it it correlates with the food industry um any type of machinery that they need to process foods any chemicals they need to process foods and my dad was an fmc food machinery and chemicals employee for 17 years and transporter of human remains for the cultwhere what where would he get these remains um people believe it or not if they find a body

that is unclaimed or a drug addict or something like that has passed away under a bridge or whatever a lot of times if people don't come forward to claim the body or cremate the body they will donate it to science so i think that's kind of how it started they were using um you know people that were unclaimed that didn't have family or anything like that and they were using the cadavers for science and then it just kind of went from there but it got really bad now they're using just anybody they can get their hands on so they'll use random people that die for these experiments and then there's also the the child experiments yeah after my stepmom her mom passed away her husband was into the cult and they tried to change her life and get into christianity and stuff like that and clean up clean up their life a little bit and and get away from the alcohol and drug use and stuff but um when she passed away they couldn't afford to do a service for her and he actually put out the idea of donating her body we're like no like we're not doing that with her you know so we all you know pitched in and forked up to have a service done for her so that she wouldn't have been donated to science that's ridiculous i think it's i don't i don't think it's right you know it's one thing if you if you sign papers and you're willing you're willing to do that hey when you know when it's my time and i go donate me to science sure i mean a lot of people donate their organs i'm an organ donor sure i mean sobut yeah like i said there anything that you um can liquefy or make into a powder can be sold so there's a lot of these things um you know traces of it going into your processed foods your juicesthat's so disgusting well it's occultism you know and they want everybody in on the practice so they put it in your food unknowingly and that's the that's the part that i think um is most upsetting is people don't even know what they're eating half the time or what's in it half the time or what companies that these foods are being processed through which companies are involved in it is there a way for people to find that out is that information has somebody put that out and somebody can go they watch a youtube video or go look up articles they can research all day long i mean at this point it almost seems like they're all the big conglomerates are in on it cal log you know all of them um buti don't remember what i was saying i keep doing that it's okay we're just talking about the human remains and food and if people can have access in any way instead of doing research and and trying to figure it out and just stop eating processed food you know get on the herbs stop taking the farmies um i i have a really good herb shop that i go to and i get herbs for healing you know and natural healing techniques for these ailments anything any ailment that you have um you know can be healed

your everything that you need to heal your body is in the food that you eat so you really just have to watch what you eat stop eating processed food eat whole foods uh take herbsand get off of the processed foods and that's how you stop supporting these people i haven't had cable or internet my entire adult life for the last 15 years and we had it growing up and stuff like that but i've never had cable or internet i mean i don't support them so i don't buy their movies i don't support pedo so i don't buy their music i don't eat processed foods i mean i do every once in a while i think everybody does you can't really help it at this point it's everywhere but i mean i i try to stay away from a lot of that stuff you know i don't have cable or internet so i don't buy into it so stop buying into it i think if everybody did that a lot of these places wouldn't be able to continue the way that they are and we're the ones that find their page by buying their products buying their music buying their food going to their concerts going to their shows going you know we're the ones that sign their paychecks by doing that so if everybody would stop doing that um stop buying their products stop participatinga lot of it would diminisha hundred percent i couldn't agree more with you and i think that that's the absolute best advice i always say like we pay for so much more than just with money like watching on the tv and going to a concert and buying an album whatever it is just participating in things that we know hey this person probably doesn't stand for things that that we stand for who cares if they have a good song like there's tons of independent artists and there's always there's people working on the other side that you can go support that have just as good if not better quality things than what most people have been exposed to in the mainstream absolutely absolutely you know the mainstream is owned by all of their friends in the cult you know so they only push the narrative that they want you to see and know um and that's just how it is that's i mean don't support mainstream turn the tv off you know stop paying for cable how prevalent are cults as far as i know globally we can say that but i think another piece that is hard for others to grasp their mind around is that piece of how prevalent this child abuse is how prevalent these cults are and kind of where that landscape lies in the worldwhat do you mean like how many cults are there how how spread out is this how big thousands thousands you know there's lots of them too you know but they all say it's all one and the same that's how you know that's how i was taught that's what i've heard growing up it's all one and the same um it's brotherhood you know it's brotherhood say you and me and a bunch of other survivors get together to do what we're doing and raise awareness about these things um can be classified as occultism you know i mean we

could we could start our own cult it's brotherhood you know it's a coming together of people with the same common goals the only problem with the cult i came from is it is satanic and and they they do not have any regard for human life and they really only care about themselves their dick and their moneyand i've told members that you know out of pure anger and animosity for what they've done to me and many othersbut it is true i mean thatthey don't care about humans i've watched a lot of human humans die you know what men women and children whether by hunt um they're notorious for making murder look accidental my father would run people off the road he would strangle women to death drug them so it would look like an accidental overdose or it would look like a hanging instead of a strangulation and it would look like they just ran off the road in a single car accident i know a lot of people would have died in single car accidents that were run off the road by members of the coal and sometimes i would be forced to be in the car i didn't even know where you know i thought we were driving somewhere and then all of a sudden you know [___] was going down so what would be the reasoning for running were these targeted people that people targeted that were trying to get help trying to get out you know that grew up friends of mine that grew up in the cold being drugged silencedand so they would just take them out instead of allowing them to go speak they would maybe know their schedule or know where they were and i'm assuming a lot of these people were probably tracked if they were in a cult with a chip or maybe their surveillance on their car or something on them and so it had access to knowing where they were to be able to stage that absolutely and these smartphones are just a way for them to continue tracking us and hunting us like i said about the hunting they do hunt and this is just a way to hunt people more easily everybody around the world has these smartphones now everybody can be listened to through these devices they can be seen through these devices they can tap into any household in america that has these devices in them and listen to every conversation going on um and that has been done to me i put surveillance around my house and then i was being watched through my own damn cameras so anything like that i mean you almost have to get back to basics which is what i think america needs and i've been saying that for a long time everybody needs to get back to basics i mean we need to go back to the barter and trade days and just start you know having a sense of community because we don't have that anymore and um people need to start coming together and realizing what's actually going on um i have tape over my camera so that i can't be seen through them but i know i can be heard i try to

put my settings off a lot of people don't know how to adjust their settings but it's important you know some people can't tap into your devices and listen to the conversations going on privately within your homeso that's a way that they track people now these advanced advanced technologies they're tracking and tracing people that way which makes it easier for them to huntwhat other hunting do they do aside from maybe surveillance or phone or chipsuh my dad would prey on women at the beach he always had binoculars these high-powered binoculars under the seat of his car and he would go park somewhere follow women stalk them um he would always introduce himself as like russell or he would use an alias his name was robert so he would tell people his name was russell it was very charming he was very good-looking um always one with the ladies and you know he would pick these women up and you know if they went home and told their mom or their friend hey i met this guy russell last night or whatever and then my dad would take him out and then they would turn up dead and you know people would be looking for this russell guy yeah she said she met this russell guy the other night so they would be looking for russell not robert you know so they used aliases they were masters of disguise uh they would shave their faces or grow their beards out when they were getting ready to hunt um so that they you know could just disguise their looks or they would they would actually use the i mean they were members of the cia too so they had masks um they had different skins they call them skins that they could put you know over your your lip you know to to change the shape of your lips they could put them on your eyelids and you know whatever they had these little skins to change the um features of your face or your profile so you wouldn't be able to be identified so they were using skins they were using masks they were using wigs hair uh bald caps you could put a bald cap over your hair and it looks like your involvedand things like that so they were masters of disguisethat's pretty scary because you think about all the people that we walk by every day and we never consider or the guy that comes up to us at a bar or the person at the park wherever it is that you meet people that's neverthey could absolutely be wearing a disguise and with these facial recognition techniques now and all this technology they're taking people's faces and um you know through their facial recognition and they're making masks of those people so i have actually gotten into the car with who i thought was my cousin because it looked exactly like him they had done a facial recognition of him and made a mask of him that fits perfectly over your face you know whoever's face that they're they're doing so it's like face-off type stuff i don't know if you've

ever seen that movie with john travolta who i've also been raped by but um they're basically taking other people's faces and put you know putting their faces on going out in public and acting as this person like i said i've gotten into cars with people who i thought it was like a cousin or a friend coming to pick me up for dinner and it wasn't it turned out to be you know somebody in disguise that's very scary and it can happen to anybody and it is happening to people it's happening to meand so going back with to your dad because i want to talk about him for a little bit so you call him a serial killer and you just talked about some of the victims that he would target was there specific was it just certain women that he would target or what was his fetish with that that would compel him to choose these certain peoplei'm not sure i just think it was a sickness yeah it was just a sickness and um i think he felt like he was good at it so i think when he would go hunt he would just prey on on the ones that looked vulnerable they they were they knew body language they they could tell by watching someone um if they were alone or if they were sad or if they needed comfort they they knew before they approached them like how they were going to approach them but just by watching themi don't know how how he targeted people i don't think that he did it just for no no sometimes just random other times there were targeted people that needed to be off yeah quote um for trying to speak out or you know that became a threat to the net worth um kind of a hitman in that way too of this world they essentially were assassination hit crew and they used to call themselves the zoo crew and it was very true because they were very much like animals uh feeding off of your you know energy and your blood and your bonesnow as far as the programs that you were involved with you talked about nasa what other experiments are happening on a high level involving humans or children they're morphing um they're morphing themselves you know with the the viral uh reptilian implants they put the parasite in their eye i there's a video on my page about that but they're morphing how do they do that it's a parasite that they're basically injecting in their bodies they're more they're morphing themselves into something that we're not i mean we're human beings but i think they're really trying to transform themselves into higher beings uh they call them reptilians aliens there's um what are they called the tall grays i think i've met a few uh which are like alien forms they're um human but not human they look human they can shape shift and they're taking these parasites dna all this stuff and mixing it together and creating their own beings there's a being that is on my page a video of a being that was found on the side of the road um they're just they're making these beings

and labs robotics things like that so trans humans essentially or just mixed breed humans so they're trying to animalsyeah now with the the thing in the eye that you were talking about there's a lot of photos that circulate online with you know why did mitt romney get punched today you know he walks in public with this big black eye and then you see it on all these very prolific people is that what you're what you're talking about with inserting the the parasite through the eye yes they've all been essentially transformed i think a lot of these people once they get into this type of practice their blood changes you know there's things in their blood that's not in our blood so it makes their uh brotherhood stronger their bloodline stronger and it's kind of kept within so it's like they want everybody to get these shots they you know they're criminalizing people that don't want to get these coveted shots and stuff but their blood's different than ours you know it's been infected with a lot of different things than ours and these things do they bring them obviously a lot of the stuff that they give regular society creates disease it creates sickness it creates all kinds of dysfunction in our body are the things that they're giving themselves in their belief system or even maybe it is scientifically factual if they're doing experiments are these things elevating them as humans is that actually true or is that more of a belief system that they have i think it's just their belief system and it's kind of a science experimentation it's just an experimentation i mean you're basically signing your life over to be experimented on and they say for these higher purposes but it's really for what you know look what it's doing to societies and culture and humanity you know look what it's doing to our children it's awful and and like i said they're forcing participation by putting it in your food and not even telling you i mean look what's going on withexactly and a lot of people have no idea what's going on with the virus or anything that we're talking about right now you know it's like the connections are really hard for people to comprehend and that's such a i mean this is my belief and this might be far-fetched for some but it is my belief knowing what i know and seeing what i have seen that covid came from one of these blood variants from from a cult member you know really probably from possibly from human remains being juiced or usedand spread like a virusand so obviously the whole um bat story i think a lot of people don't buy into that but what you're alleging is that it's actually a human experiment that they created this from and these different blood variations that they're using human meat yes that's what i think that's what i believe and call me crazy but that's what i think so they're also they're using the experiments are also in a sense instead of just we're going to find we're going to use

children we're going to use other people to do these experiments to find what can elevate us and make our blood better they're also doing the opposite how can we infect society more with being sicker how can we um how can we create bio weapons more bio weapons to release on the public yep yep that's absolutely right and then get everybody to buy it and think that it's good for them you know these smartphones when they first came out everybody was on the you know top of the line to go get them oh yeah and they still aren't about driving for these are global tracking trackers you know you could be tracked on on these devices anywhere by them and we're so addicted to them we always have them on us did you have whenever you were growing up were you did you see technology and did you see things that the general public didn't or did you have advanced notice of something like a cell phone coming out way before it was going to you yes i did my brother had all the electronics he had a you know when i was a little girl and they you know pagers were coming out and stuff like that he had laptops he had cell phones they were using twitter and youtube back then girl before anybody even knew it was big and all the elite kids were you know and these science kids in these programs around the world in this cult you know we're using them absolutely when i was a very small child my brother was making me you know get on twitter and read his twitter with them and stuff like that but they were using apps and things like that way a long time ago before they even got released to the public they were experimenting with us children getting the children addicted to them get seeing you know they were doing all that way before like i said way before they were released so are these of let's just say mark zuckerberg creating this in his college dorm is all of that even how these companies came to me were these always government programs and that's the story the facade that they feed the public i mean it's possible i haven't really done a whole lot of research on zuckerberg but it i don't know where he came from what his family ties were or what programs he could have been in as a child either and even programs that he was in that he didn't really even know he was a part of you know because they they don't tell you you know they just do things to you and then you go home and it's kind of like you're back to normal life or whatever you don't you don't identify those things but i don't know where he came from i don't know what his family life was like i don't know who his family was or what ties they had to the network but i'm sure they're there and there's probably a reason why he's who he is now and you mentioned bloodlines are something that's of importance to them is that a big part of distinguishing who kind of makes it in the world or most of the

people that we look at as high positions in authority or society or government wherever are most of those are all of those people bloodlines is that a big part too of how people elevate in society well it is said that there's really only 13 bloodlines that you can stem from so there's only 13 families basically that you came from if you go back in in your history you can figure that which bloodline you came from and then go from there um they say to follow your maternal lineage back to to figure that out what you know what what family you actually came from umbut yeah they do a lot of the ancestral relationships are very common in the cult father sleeping with daughters brothers and sisters cousins you know is is all umpracticed in common you know we were groomed for that and having you know being raped by all the men in our family and group sex you know it was not uncommon uh to see a room full of naked people it was not uncommon to be raped in a room full of people and other people were being raped also um was not uncommon to walk in the house and see your grandpa having sex with the dog on the floor and choking the dog they were into bestiality real real sick satanist type violent porn you know it's like they would have sex with anythingthey were having sex with animals they were forcing participation from us they would have sex with corpse and human remains my dad became a necrophiliac i think from being around it he became attracted to it um he became a necro they call it necro there was a band back in the day called necro umhe was a necro he would have sex with human remains in corpse and then force participation from us to do the same child porn with corpse it's disgusting you know so we've been infected with every disease known to man i've had infections i've been infected you know by by means of rape or just you know in labs and stuff like that for experimentation purposes but uh we are immune we are immunebecause it's strengthening the immune system strengthening your bloodline strengthening familyand really they want to keep we're i mean most people that are that exist in the world now are mixed bloodlines whether that's double mixed or it's a whole bunch of different lineages that have just over time mixed together it's important for them to keep that that first bloodline that they believe is the most pure generation after generation after generation yepit's wild belief system you know and they they did allow us to study different religions i would i would scream yeshua yeshua is the name of jesus and i never was taught about jesus but i would scream his name during violent rape and torture so jesus was with me um through it all and i believe that he is who saved me and the only reason why i'm still alivedo you recall ever hearing that name before or did you just inherently that was spoken to

you through him it was spoken to me through yeshua i have met and heard the voice of yeshua and he has guided me and directed me and delivered me from a lot of this evil he saved me he continues to save me and protect me is that you mentioned that that helped you get through what else did you did you do to cope with all of that growing up i was suicidal in my youth 11 12 13 years old i just wanted to die i was being used so much i was sore all the time i had hip problems back problems i couldn't sit down i couldn't wipe my butt without pain or blood um you know it was just awful i wanted to die i just felt like a piece of meat and i just felt like i was being used and i was i was i was just a sold piece of meat being used and that was it you know i had very minimal things as a child um i didn't have a whole lot growing up you know we had bicycles and stuff like that but we were used they had us to use us for a cult practice and for money they would get money sent to them in po boxes they had po boxes and safety deposit boxes around florida uh people had access to them they would leave money and different things in there for my parents and my family so they were being paid you know i remember going to the post office and seeing them collect cash out of the boxes it's just it's amazing how this blends in so well to what we see every day to where it's hard to even consciously it's like once you know you can't unknow but if you have no idea they've massaged themselves so smoothly into society and the way that they present themselves and even entertainment how it's looked at as something to worship instead of something of what it actually is worshiping satan and like he's doing initiation that's what you just said it's entertainment and for them it was created for entertainment purposes but they were into some really sick [__] so they've got the upper world disney stuff that you see in mainstream media that's pushed to get it's basically to lure the kids there once you're there then they can start programming you then they can start getting you into these other programs and it's really kind of an innocent way that they get you into them and you don't even realize that a lot of parents don't even realize it you know taking your kids to these places and getting drawn into these things but it is it's for entertainment purposes but unfortunately i was used for a lot of sadistic and violent porn underground you know by the same companies nickelodeon that you see on tv you know we're doing this to me undergroundas a child and it's rampant in florida it's rampant all over the world but i grew up in florida and the network here and there are freemasonry cop gangs are in on it you know that will pick you up or or you know and take you to places they're basically traffickers they don't even have to rape you but they just have to get you to where you're going

where you're told where they're told to bring you and drop you off you know so they there there are traffickers that that that won't rape you but they will pick you up and take you where where they're told to take you and they're traffickers i mean they're traffickers toonow how does freemasonry fit into all this people tend to separate that also and say oh well it's just you know my grandpa was a freemason one of the lower level or this person it's not bad it's not what do you have to say about freemasonry having seen it all the way from the very top levels i grew up going to the lodges the blue blue lodge mostly um all over the place i've been to lodges everywhere it's a brotherhood you know um i was trained as a mason there's only men allowed and it's a brotherhood so it's only men allowed but i was a little girl being raised by these men and freemasonry and in the lodges so i had a lot of dads essentially and that were raising me and bringing me up this way i was taught to fight i was taught ballistics i was taught how to shoot um i am mk ultra and they are manufactured killers you know and they basically train you so i was a gymnast i was being used um in performances i was uh being used on stage at some of these shows ozzy osbourne and all these other concerts when i was a kid i would be taken to and raped i would be raped on stage i would be used thrown into the audience for other people to use um at 9 10 11 years old i was dropped from a trapeze at an ozzy osbourne concert into the crowd and my brother was telling me when you get down there just start telling people that you're only 12 you're only 12 just say you're only 12. he got in trouble for telling me to say that because once he dropped me down into the crowd i started saying i'm only 12 i'm only 12. but he made me lie i wasn't 12 i was actually 10. but i was really tall you know skinny lanky long legs and and i could i could pass for being a little bit older back thenoh my gosh i can't imagine how horrific that must have been as a kid and everybody on stage all the people that are organizing this maybe not all of them that are organizing it um lighting and things like that but the entertainers on stage are very aware that this is happening oh yeah absolutely they're part of the program absolutely you see it happen on stage right in front of you all the time people being initiated blindfolded put in these you know suits i put pictures on my on my page and their initiation process um into the cult and into freemasonry and you know different ranks and degrees i've been through a lot of them i have pads what they call pads on the bottom of my feet from walking fire to kind of mind over matter practice they put you through and a desensitization process they put you through but i do have pads on the bottom of my feet from walking fire um hot coals and things like that that they would make us do

what was the purpose of having you do that is that just a practice it's a it's just a practice that they do um at fires you know they have these bonfires they worship satan around a fire um we do chants and stuff like that we would do and a lot of times we would be masked and drugged they were giving us these potions but they were probably you know adrenochrome and things like that they were giving us shots of so it was like okay girls time to take your shots you know so it was like we were you know we we weren't act like we were the adults and we were taking the shots so we would drink these little potions and then put our masks on and our white t-shirts on and then we would be used uh for ritual abuse raped by all the men literally formally trained uh with sex with the younger men so the younger boys would come through and practice on us and then the older men would come through and practice on us when they were done raping usit's a lot of harvesting energy too for them they're they're literally like vampires you know they are vampires they feed on adrenalized blood on your energy that they can suck from you and they've got it down to a science now this adrenalized blood that's another thing that people say that's just a conspiracy theory nobody's doing that no i used to get sucked around my neck they have like a pick it was like a pick and after um tormenting you because they can get you you know they'll work they'll get you worked up they'll beat on you they'll hit you they'll kick you around they'll get you so scared and so confused where you're just full of adrenaline and then they'll you know stab you in your neck with this pick and my brother usually they would extract it and then drink it but my brother would drink it right out of my neck he was just like a pro at it and thought he was good at it so he'd stick his pick in my neck and yeah it's torture but it happened to me my whole life so it was likei would i mean he would say oh you like it you like he would blame like you blame it on me like oh you like it and i'm like i don't have a choice in the matter here you know i've never been giving given a choicebut to avoid a lot of the trauma sometimes i would sit there and just kind of kink my neck over and just let him do it like okay just do it just leave me alone you knowwhy do you why is blood so important i know there's people that listen it that are listening that have heard of adrenochrome that's not something though that i have actually talked about on here um really in depth from from the experience of somebody why is that so important to them what does that signify and what does it do to somebody if they drink it because it's like a drug um from my experience when i have seen people on it they become really high really hyper their pupils dilate you can get really big you just it's just really big rush they get all

excited you know they're they have all this energy and then they're and then they're ready to hunt you know so i don't think adrenal chrome i i mean i'm sure they're taking it alone but i think they're also mixing it with other drugs you know to get you know high reach higher levels of consciousness that's the only way to do that is through these these drugsand so there's the energy harvesting like you said where blood is you know especially from a child you're infusing yourself in their eyes with this innocent pure blood that is now in your body is there any truth to this being something that they believe is a fountain of youth also yes yes they believe that it keeps them youthful and young yes is it addictive highly i think that's why it's so rampant because people really can't stop the practice and they don't want to and when they try to they're kind of sucked back into the cult you know and i've seen people try to leave and then get sucked back in and start practicing again and start doing these things what is different with blood versus say another drug like heroin or meth or something why don't they just try to get high off of those things what is different with the high that they get from this adrenaline they do i think when adrenal chrome's not available to them that's what they use they use the street drugs they use you know all those other drugs that are essentially plant-based those are all plant-based opiates from opium and opioids yeah and afghanistan is one of the um has you know like some of the biggest poppy fields in the world and opium opiates that's rampant in afghanistan places like that so i think the invasion afghanistan had a little more to do with what we've been told i'm sure there's definitely a lot of that story that well after the invasion too of afghanistan back in 2001 after the attacks like that's when big pharma really started pumping out this whole um the opioids and the pill epidemic startedand obviously they want to take anything that'sexactly well and exactly and uh zachary rose and tim rose i was a child bride too and forced to live with them when i was a child um they've they've beat me to death before and left me in shallow graves and i was resuscitated i was used by them a lot um i've been a realtor for them i've sold them houses they are grave diggers they run heavy equipment they own a construction company runs one of the um biggest construction companies in indian river county he builds roadways parking lots things like that um and i've seen them very human remains in and around indian river county my whole life you know and they have a conglomerate together with kevin hawkins they're flipping these properties they'll buy a property and restore it and bury evidence and human remains in the yard and flip it to unsuspecting new buyers um so it's a practice they are doing it it is an operation it is going on um but they

got into the pill mill the pill mills he actually served eight i think out of a 16-year sentence for um operating pill mills in the state of florida being part of the whole oxy express that was going on down there they have like i said food machinery and chemicals fmc where my dad worked they manufacture machines that and pill presses so they were buying pill presses not just juicing equipment for the packing houses in the fruit business but they were buying um machines they were pressing their own pills buying all the ingredients to manufacture their own pharmaceuticals and selling them to people through these pill mills so there was a lot of people they had a a customer base coming from ohio tennessee kentucky where they couldn't get drugs up there they were coming down to florida where the laws were relaxed on it they were getting around loopholes in the walls they were getting around and they were operating these huge uh pill mills making millions within a couple of years and people all over the world in all of the united states flying to florida just to get drugs from them because they were easy to get and they were pushing them so hard oh my gosh and this this started after like i said after the invasion of afghanistan and they took over the poppy fields i've had um friends that were in the military saying who do you think is over there guarding the poppy fields like u.s military i've been over there you know guarding the poppy fields i had people in the military posting pictures while they were over there so i think a lot of that came from from over there it's worldwide like i said it's it's worldwide and it is a huge problem but my family is in nicole everybody that i know is nicole everybody that i've ever known is in the cult i wasn't allowed to know anybody outside of it what jobs did you have you mentioned a realtor what things did did you get that's it placed into your yeah that's a i i graduated high school i got my real estate license and that's all i know so for 16 17 years now i have been a licensed realtor in indian river county and working for the lafferty group um a lot of people don't know this but the lafferty group real estate i've worked for for the last eight years is also lacquered group private investigations so i have been used for investigative purposes in the last year or eight years um to infiltrate you know the only way to infiltrate a network like this is from the inside so i have been used for investigative purposes because i am on the inside and technically underground is a term we use i don't you know i didn't grow up underground although there is kids in the cult that do never see the light of day and are literally underground but i am underground because people don't know who i am um there are people that have known me in indian river county for 20 25 years that don't know who i am or what i've been used for where i've

been that's what i was going to ask do people are people aware that you've been trying to tell your story or do you kind of keep that part separate where you're telling people information but the facade that you put out to the public is still very normal to people right and that's what i was expected to do on my facebook i was only allowed to post you know about my work and my my travels and and this and that and it was not to be talked about obviously do they know that you're talking out at all now i am seeing um some brand new twitter accounts being made and trying to follow me with zero followers and things like that so i know and i've got little bots piping up telling me oh that never happened to you you're crazy you know whatever things like that so i think there are people that are becoming aware that i'm speaking about it now and that's fine i i am a targeted individual so let that be known just be aware it's almost you're you're damned if you do and you're damned if you don't you know like i have felt that way my entire life i am damned if i do and i'm damned if i don't so here i am i'm so grateful that you're here and i know where we kind of touched on that two-hour mark that we'd maybe kind of wrap it up around there um one thing though i do want to ask before i get off i can't not ask this because i know that i'll have people say why didn't you ask her about ron desantis in florida before we got off and we can definitely there's so much that we talked about today that i want to dive more particularly into you but i wanted to ask you about him people ask me about him and i'm like i don't know he looks great but i'm not in florida no but he's somebody that that society looks at as you know this really great you know he's known as america's governor or yeah and everywhere so i wanted to ask you about him too um from being in florida and having some insight on that what your thoughts are are on him the only thing that i really know because like i said i don't watch mainstream media i don't have cable i don't really keep it i mean it's hard for me to keep up with so many people i have a few people that i'm zeroing on on myself personally but desantis is not one of them but i do know that he owns uh westgate uh properties in and around florida and i know that my entire life i have been taken to westgate properties and ritually abused and raped by cult members and gang raped by you know on camping trips these these ranches are huge they are wetlands a lot of times they are ranch lands they are used for camping recreational use they're not housing develops it's not residential property um so people go out there um westgate river ranch in particular i've been taken to river ranch my entire life um they have a bar out there it's basically a bunch of campgrounds and you know i've i've been used there so i know that it's happening on his

properties um because i've been there a lot of people have you know with their four-wheelers and their side-by-sides and their campers and they're out there doing that um also uh state state parks and um national parks are being used a lot for occult practice you know we used to go and go camping a lot when we were kids but i would be taken basically out into the woods where nobody would hear you scream because you're in these vast open areas and used for ritual purposes you know forced to chant around fires and and a lot of them would go out and be masked they would have gowns on or they would have hoods on or masks on so everybody everybody was doing their their thing in these in these satanic meetings and meeting places and a lot of them like i said were national parks state parks i have been taken to and used all over the world all over the united states and especially in florida but that's all i really have on desantis is this westcake properties i have been taken to and used on so i don't know horrific you know like i know so many things happen that skirt under the radar so like you said there's people that aren't involved that would never know who is because everything looks perfect they look like any normal person from the outside so i can totally get that there's so much hidden so well that there's not investigations going into it because people don't even know that there's something to investigate but i also understand that you know guilty by association sometimes too with with connections and you look at a lot of prolific people that we hold high in society and it's like first of all how did you get there and then second you know that's a huge one yeah how did you get there and who did you know and who did you blow and that's kind of the you know running joke in the cause okay who did she know or who did she blow you know who or him it didn't matter exactly right and so that's just that's something too that i i hope people start asking a little bit more instead of just trusting that oh they got there on their intelligence their good will they're a good person it's like or did they get to the root you know and i keep saying that to people get to the root get to the roots get to the roots it's very important that you get to the roots of these people these issues um you know dig find out where they came from find out their familial ties because everybody has them a hundred percent and if you're i mean most people most people are tied to the cult in some way i mean most people have been affected by occultism in their life and don't even know it but yes our whole lives since we're born we're thrown in front of disney right everybody nobody is safe from it not and not a single person to stay from it there's no exceptions to that rule everybody is affected by occultism that's really been like one of the hardest things for me is like realizing even as

much as i know now how little i actually know because it's like i'll have girlfriends that get this name brand purse and then i'm like oh i forgot about that brand i'm gonna go research it and it's like oh my gosh are victoria's secret or disney or whatever it is it's like when you actually go look at these things you realize how much corruption is behind all these things that they inflate in front of our faces and make us want and desire and crave and bring money yes it's branding um just like they do you know cattle it's branding you know and i don't want some dude's name on my underwear i don't want some girl's name you know what i mean so i wear plain white t-shirts i don't wear logos i don't wear any of that stuff i don't support i don't you know i never wore the name brand clothes the hill figure the tommy the this that i never i never did that you know so like i said stop supporting them you know people can and hopefully will stop supporting them stop buying their brands stop branding yourself with their materials stop you know what i mean stop eating their foods their processed foods stop going to their movies stop buying their music stop buying their equipment and electronicsexactly and stop giving it your time your attention stop giving it any part of you i live very old school i don't have cable you know so entertainment purposes are spent on bike rides and other healthier activities than than that mind numbing stuff um like i said i try to watch my diet i try to treat myself holistically and naturally at home without going to the doctors i don't like taking pharmaceuticals i don't like even taking aspirin or ibuprofen you knowabsolutely no i'm i'm completely with you on that especially after learning about you know where a lot of this stuff comes from and like what the end goal is like it's never some of it might help like there's probably a few times a year that i take say an ibuprofen but even that i used to take and pop those all the time if i needed anything for pain or just to take the edge off something or if i worked out and i was sore like so unconsciously just i'm just gonna take four of these you know and it's like i never even considered what that was doing to my body over time and like who that's benefiting and i never even questioned well can i heal this myself can i do something else besides just pop this you know and look up the statistics about the average american and how many pills they eat in their lifetime that's crazy oh my gosh i don't i can't even fathom how many i've even taken in my life before understanding the power of my own healing and how i can take charge of that so much on my own you know people don't realize that pharmaceuticals and medicine is essentially plant-based you know they're the these are they're deriving these things from plants and from you know the natural earth so you know if you you can treat yourself you

know holistically and naturally at home with herbs and the same type of plants that they're putting in your pharmaceuticals with other chemicals exactly but you can see the herbs without the chemicals yeah yes and i really hope like i hope society comes back to starting to look at some of that it will i think we're i think we're moving forward in that direction to be honest with you and with everything that's going on and more awareness being erased about that type of stuff i think that's the direction we're moving and that's the direction that we're heading and i am i'm happy about that you know and you do you you have to lead by example so it's just other people will learn from you when you start taking taking those steps yourself i think i just heard everybody takes a huge step forward in that direction just to get away from the mess that we're in you know a hundred percent and i think it's so inspiring what you're doing and risking to share this information because i know i i don't know but i can only imagine how much how much you're risking by by exposing a lot of this and talking about it especially on public and social platforms so kayla i appreciate you coming on i'd love to i mean there was a lot that you talked about today that i'd love to unpack more i didn't want to spend the whole time talking about i wanted to dig into you a little bit in your story versus focusing just on the white house or just on epstein and just on some of these other um aspects of your story that you talked about so i'd love to bring you on to dive a little bit deeper into some of those because i know that a lot of people including myself probably have a lot of questions on some of that that maybe we haven't heard or just don't fully understand um so if you'd be open to that i'd love to bring you back on yeah absolutely and just make me a list of questions or whatever and we can go through them yeah cause i know there's just there's so much to cover it's like how do you how do you even begin to especially because a lot of what what you're talking about you have to tell other stories in order to understand the ones so there's so much to unpack and go back and forth with so let's definitely like let's do this again um twitter i lock eyes that is your handle are you on social platforms anywhere else that people can connect with you no not anymore i was when i was a realtor in florida but i'm not a realtor in florida anymore i have shut those accounts down and the only one i have now is twitter so you can find me on there if you have questions or whatever and you guys i really encourage you she's dropping stuff like crazy like i go through her feed every day and i'm just i'm mind blown by a lot of the stuff that she's talked about and we talked about a little bit of it but just in these last couple weeks that she's been on there you go down her page and you are gonna learn so much that you have

never been apart either you know um get on there with love and understanding and try to to understand you know a lot of people i'm seeing angry comments and things like that which is totally normal and and understandable but um these things are being done these things i have experienced and and it is hard to share but um i hope that people can understand you know you know where i'm coming from and you present it in a way that's very educational too you know and i appreciate that because it's it's nice and it's amazing seeing survivors now coming out and using their voices it can get very emotional though um and i i can't imagine from experiencing it and trying to talk about it it has to be a whole different level of emotion you know so kaylee the way that she has been presenting information it's it's almost like reading a story you know she has these really incredibly articulate threads that that walk you through situations and people and names and in a way that's palatable and in a way that i don't want to say is unemotional um but it's not so much focused on the emotions versus the information so i think even people that are newer to this they can go they can go and flow through and maybe get angry or sad i feel that way whenever i read it it's very it's triggering you know it's hard reading exactly and for me i'm desensitized to a lot of that stuff because i've been around it so it's real easy for me to talk about people are like god how can you say that with just ease like you can just talk about it like it's no big deal and i'm like well i mean honestly i'm just desensitized i guess you know in your life you don't know anything different you now but that was for your entire life even still like that's all you've ever known really as being normal you know life yeahgrateful for you i'm so happy that i i mean this is my first time actually meeting you um i know we're all the way across the country i'm in nevada but it's it's awesome to actually get to talk to you because i've been chatting with you so much on on twitter so i appreciate so much coming on here kaylee and i'm sure everybody's on the edge of their seats like i can't wait for her to come on again so i'm going to try to connect with you again and so we can maybe put your whole series out together and just do a bunch of filming make sure your story's out there and get this information out there as much as possible sure yeah absolutely i appreciate it thank you you're so welcome thank you and thank you to everybody listening this show wouldn't exist without you guys and i know i say this a lot on this podcast but i was really nervous to start talking about this stuff on a podcast and it's just been amazing the support that i've gotten and realizing how many people actually do care about learning about this they just don't know where to go to learn so thank you everybody who's

using this platform as a space to to learn and to share and to elevate voices i'm seeing so many people share these interviews on their channels and talk about them and connect on social media so thank you to everybody who's listening it means the absolute world to me please connect with kaylee please on twitter share this interview everywhere take clips of it post it on social media share it with people that you know that that will listen share it with people that that you don't think will all those are little seeds that we're planning this is all information that it's happening whether or not we want to know about it and we need to empower ourselves with understanding how this system actually works and listening to the people who have actually experienced it versus going and listening to the news or listening to the government tell us about it like we need to actually go to survivors and listen to them they're the ones that have the experiences um connect with our sister podcast the save our children podcast with becky and bridget they're also um one of our sponsors and then connect with us on on telegram too it's a little bit less shadow banned and the algorithms are different we're able to share this information a little bit more um so connect with us on telegram that information is below connect with hatch truth who is also a big supporter of ours he's given you guys a discount code to his um his retail store um i don't benefit from that at all it's just a gift that he gave and it's somebody that i met on telegram that just really appreciated the show and this information so they share it to their really big channels which is awesome um so please just support all the people supporting us support the survivors and thank you guys so much for supporting us and kaylee thank you again so much for being here yeah thank you i really appreciate it i appreciate you too and and we'll see you guys next week yep i'll talk soon

Sayings

The truth will out, the truth will shout, the truth will set us free

"The only thing necessary for the triumph of evil is that good men do nothing" – Edmund Burke

"He who does not bellow the truth when he knows the truth makes himself the accomplice of liars and forgers." Charles Peguy

To sin by silence when we should protest makes cowards out of men – Ella Wheeler Wilcox

Every time we act in the face of fear, we dilute it's power and increase our confidence

Only the small secrets need to be protected, the large ones are kept secret by public incredulity – Marshall McLuhan

Let justice be done though the heavens fall – Fiat justitia ruat cælum

Put the enemy at unease by making information they do not want known to be known…

The individual is handicapped by coming face-to-face with a conspiracy so monstrous he cannot believe it exists. FBI Director J. Edgar Hoover

If you have found this post useful, please post on other social media – facebook, instagram, pinterest, gab, twitter, anonup, – whichever ones you are on. This is most helpful to spread the information. The people who do this are essential. Thankyou.

I am not connected to anyones Patreon accounts, nor do I receive any money for my writing. I believe it is important to provide this information not hidden behind paywalls, and yes I suffer financial hardship for doing so.

I will not commit suicide and if it appears I have, then people may judge for themselves why this is so, after blogging these exposes of the top level of these "orders". I do not wish to live in the kind of world that the

psychopathic orders want to bring in, which is a world wholly and absolutely controlled by them. They commit horrific crimes of child rape, child torture, child cannibalism, child mind control and much more, which is why I wish to speak out and expose them. This carries some risk but if I am killed or go silent, my wish is for more people to tell the truth, they cannot kill us all… please set up your own blogs… replace me 100 fold…

the reason you don't see Kennedy on the black book is because they flew under spouse name, Richardson.

The transcript:

I'm confused as to why RFK would put out his book exposing Fauci the way he did knowing all this info is easily out there to be found. Why hasn't the "Big Guys' come after JFK exposing him in all of this? Any thoughts?

I'm confused too. But as they say in the show he was passed off to that horrible pedo after his dad was killed.
