Cali Shai Bergandi (I Lack Eyes) Part 2

Posted on 2021, November, 22 by foxblog

Updated 2026 Sept 21

Cali (Claire Walker) has had another episode with Emma of *the Imagination*...

They have been receiving some ugly targeting on social media and so I am putting this online, before I have had a chance to listen properly. I have included the autotranscript below and also the links to Part 1.

Updated 2026 Sept 21 The bitchute links are down as well now. As I no longer support Emma due to her attacking survivors and advocates, and being gatekeeper and accessory to harm for her husband David Hall aka *Grey Area Monarch*, I have not replaced the links, the transcripts are here though.

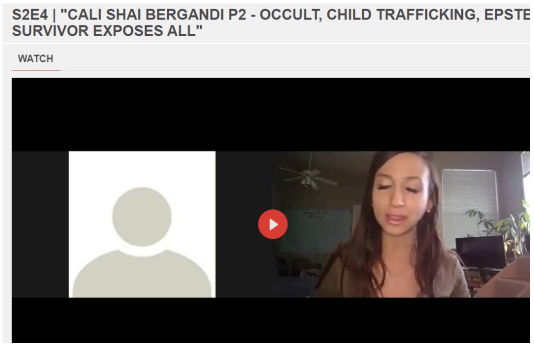

I regret helping Emma, and putting Claire in contact with her, especially as Claire was subsequently jailed. Was it inevitable if Claire told her story as payback from her family? Did Emma take insufficient precautions with a vulnerable survivor and it set off destructive programming?

Unfortunately it is one of several jailings, disappearances and surrounding Emma and her husband David.

This interview was the first to propel Emma to a much wider audience.

[2b] 2021 Nov 22 Bitchute The Imagination Podcast S2E3 S2E4 | *"Cali Shai Bergandi P2 – Occult, Child Trafficking, Epstein, NASA & SRA Survivor Exposes ALL"* https://www.bitchute.com/video/gq1dNOCkQEWI/ Dead link

Shownotes *– Cali is back again for Part 2 as promised! I asked you all to break the internet with Cali's story… and you did just that, so I hope you enjoy this episode just as much! Cali is a survivor of elite child sex trafficking, occultism, SRA, and was involved in many government operations and MK Ul-tra experiments. She bravely shares her childhood experiences with us as we take a deeper dive into her father's mysterious death and the loss of her son in the first part of the show and evolve the conversation into more details surrounding*

*Ep-stein, MK Ul-tra, Disney, The Royal Family (Princess Diana anyone?) and so much more… Cali is a truther and her story is important. It would mean the world to us if you could help us get this story out by sharing far and wide, commenting, subscribing, and 'liking' this video. It's time to make survivors the new MSM and look to them as authorities on answering the many questions we have about the world so we can work together to give survivors like Cali the justice they deserve and create a better future for the next generations of children. *The views, beliefs, and opinions expressed in this podcast are not necessarily the views,, beliefs, or opinions of the host or company. This platform exists to elevate voices of survivors and to have hard, unbiased, and unconventional conversations*

AutoTranscript

what's up you guys welcome to the imagination i'm your host emma and today we are going to do the promised part to you with kate sabergandy who was our guest last week um kaylee is in a cult and human trafficking amongst way more things um she's a survivor of pretty much everything that that you could possibly think of and she had an absolutely incredible episode last week which went semi-viral and a sense of my podcast is very small it doesn't get a ton of views on the episodes and way over 10 000 people have have watched this um she's had about 12 to 1 300 views deleted actually from youtube um comments deleted there was a lot of censorship happening around this which tells me that you know so many more of you than what you can even see on youtube we're tuning in and i just want to thank everybody for that because her story was really important she gave a lot of information and i'm really grateful that those of you that listen tuned in and i know that you're all really excited to have kaylee back and i had so many requests saying yes please bring her on for a part two so thank you guys so much for listening and thank you kaylee for being here again with me today no problem thank you absolutely man my brain is still spinning from last week all the information that that you gave i was processing all week and it affected me at different times just thinking about this you know and this this network and how this works and i was telling you before this call started you know people from all over the world have alleged these same things which is interesting because none of you know each other this information is scrubbed off the internet and that's what i always encourage people to ask is how do so many people know about the same thing if it's not true and i know with every whenever you come out and talk about stuff there's always people that really grasp onto it and aren't really encouraged to learn and then there's the people that that combat it and don't want that information out um and i know you deal with both you get a lot of support and you also get and i know we'll talk about that a little bit but you also get people that come after you whenever you try to talk about this and you mentioned last time you were targeted individuals so i thought we'd start i had somebody ask and i thought it would be i didn't ask this last time i wanted to ask so you could explain to people why did you start wanting to go public with your story because first of all this stuff's not easy to talk about and second there is a target on on your back or anybody's back who tries to bring this information up so i'd love if you could maybe lead us into that um because i think that your story it doesn't do justice if people don't understand exactly why you're doing it uh the reason for me um and and many others i'm seeing online and connecting with a lot of other mothers uh whose

children have been taken away by the system by the same people that they've been trafficked to through this network in these networks and in florida in particular because that's where i'm from but that's that's the reason why i'm doing it my son was fraudulently taken based on false accusations all the dcf reports were unfounded and he was removed from my home and i was set up and framed by members of the network attorneys and judges that i have had dealings with their families throughout the years and trafficked and raped by them through the network in the system that i've grown up in out of the government sexley um so that's why i'm doing it and speaking out um you know for my son and because of my son and and the many other mothers out there whose children have been taken by fraudulent means as well for the same same reasons i'm seeing it it's like a pattern you know and i don't know if you're able to talk about um this at all what were the reasons why did they come after your son um well it's my belief that this started many years ago in 2016 i was hospitalized for chest pain and shortness of breath so august um about august 10th i was hospitalized in 2016. by the 18th i was being prepped for emergency surgery to remove a baseball-sized tumor from my uh behind my stomach and um and that was done in sebastian river medical and on uh august 18th was the day of my surgery in 2016 i will never forget it because it was like a huge inconvenience and i'm going i thought you were gonna send me home with some heartburn medicine now i'm being prepped for emergency surgery like i don't have time for this you know so um after my surgery i got home and was recovering and i had a six week recovery and within three weeks of me being home from emergency surgery and cut open and i had five inches incisions on my abdomen um from laparoscopic surgery um i was left uh for dead inside my house um i believe my father and mother participated in trying to make my attempted murder look like an accident or a surgical accident um i woke up in my bed and had been strangled my throat hurt the back of my head was sore like i had been slammed up against the wallwhile i was being choked choked and asphyxiated but i woke up in my bed uh you know recovering from surgery my stomach was bloated like it looked like i was about seven months pregnant i was so bloated after surgery and i just thought that maybe it was from the surgery um but i had been raped i had been left in my bed um my teeth you know my false teeth at the time they you know i had the removables in and out because i was still having my teeth worked on before i got my permanent so my teeth my false teeth were removed i had no pants on there was fecal matter in the bed i was completely discombobulated and confused like i said my neck

hurt my head the back of my head hurt and i didn't know what was happening to me and then i i ended up taking myself to the doctor and being treated for an infection that the doctor told me was a bacterial infection and it was a not a common bacteria it was a bacteria that was um that only i guess showed up on testsi don't know it was like a bacteria from sex with corpse or something like that so i knew i had been raped um you know when i woke up there was a pot of soup on high on on my stove that somebody had left uh maybe an attempt to burn my house down with me in it and make it look like an accident like i had just went and laid down or something after my surgery and left the soup on high on my stove so i woke up to that um three weeks after my emergency surgery they were making it you know look at a surgical accident and then three weeks um you know three weeks after my surgery was when my dad there was a body found in his house um so it was september 8th so my surgery was on the 18th and by september 8th three or four weeks later three weeks later you know there was a body that was found in my dad's house there was a lot of suspicion surrounding his death in um september of 2016. there were members of the family including myself that had seen him alive within two or three days you know because after the surgery he was he kept coming over to my house and so the body that they found they alleged was his and you're saying that it was just a body and it wasn't him right that he had planted a body in his house and disappeared ever express to you about disappearing or what would be the reason that he would want to do thathe did indicate to me that i was never going to see him again and i didn't know what that meant i thought it meant that you know he thought he was gonna die soon or whatever because he think he had some ailments you know that he wasn't treating and he wasn't really taking care of himself by that point so um i didn't he'd fake his death to hide from something or else do you think it would help him get potentially deeper into these networks um more as an anonymous member and people think he's dead but he's doing work for them right both um so i think he was still being used but i think he was being monitored i think he knew possibly that he was being investigated um one i got admitted to the hospital my father and i were not on speaking terms for a long time and it was just like in passing we would speak but i didn't allow him around my son i didn't you know i didn't never went to his house to hang out with him or anything like that we didn't have that kind of relationship and it was you know months at a time we wouldn't we wouldn't speak so like essentially i only really saw him or talked to him a couple times a year but um no i think he knew he was being investigated because when i got

admitted into the hospital that was the first time um that i knew of outside of the network that my body had been scanned um they did an mri and stuff on me and they found they asked me the surgeon asked me if i had ever been into a car accident or had like a piece of metal or shrapnel in my abdomen area and i'm like no well that was my chip there was a chip in me and they found it on the scan when i was admitted into the hospital they also found a collapsed diaphragm from strangulation of violent rape and he said my surgeon told me that um most collapsed diaphragms require surgery to heal and mine had a lot of scar tissue on it he took pictures um you know doing the uh endoscopy and the colonoscopy and everything they did on me he took pictures of the collapse diaphragm with scar tissue on it he asked me if i had ever been strangled and violently raped um he asked me about the chip that was found in my um abdomen uh vaginal wall so it was you know down my lower pelvic area where it was found so that was the first time that my body had been um actually like scanned um that's the first time you were aware of the chip too or did you know before that and that was kind of your first validation that you actually could see it that was the first time i hadn't seen it okay that was the first time i had seen it i knew as a child it was there but it's something that you just like forget about i never thought about it i never told anybody about it i just like i told i forgot about it you know yeah but the first time i had actually like seen it so i think he knew he was being investigated which is why three weeks immediately after my emergency surgery and those fans were taken that he disappeared planted a body in his house and left and attempted to murder me in the meantime so were you a mom did you have your son yet or was this before you had your son no my son yeah he lived with me my son was just me and my son in the house okay oh my gosh so he left the pot there with your son in the house also where so the pot of soup so if it did burn down would he have been there also or else was your son being cared for by somebody else at that time while you were recovering when i woke up my son had was gone so i had a i assumed that my my mom had them you know at the timeokay so that instance so whoever and you know you're pretty sure who it was but it was that instance that was when your son was taken from you and when this battle started of you wanted wanting to to get him back they were trying to get him away from me so they could kill me and make it look like an accident and they started doing that in 2016 when he planted that body in his house and disappeared we had a funeral service for him the body was cremated it was covered up by the medical examiner and other detectives they did not do a proper investigation nobody actually from

the family identified the remains at all yeah the body was cremated and i was given a death certificate and it was just you know moved on i tried to contact detectives and other people that were there at the time when the body was discovered in the house and um they basically just kind of swept it under the rug they didn't really help me or give me any more information or really look into anything at all and i'm going there's too many suspicions surrounding this so after um i took all day they were inside the house they blocked it off they put hazardous you know material tape around the house they wouldn't let anybody in it was basically a hazmat so and i had to pay a hazardous material crew to go in there and clean up the rest of the remains once they got the body out because it was like soup the decomposition was so bad that there was actual body fluid going through the living room and through the dining room and out the back doors there was a puddle of um you know uh body fluid out the back door it was like running down the slab and down the grout lines down you know all through the house so it was really bad and i had to pay a hazardous material crew to go in and clean all that up after they removed the body um they sent me home they said look you know it was about midnight that the night that the body was discovered in his house and they sent me home and i went and took a shower at like midnight and my mom laura walker actually stayed at the house while they were removing the body from the house so they brought the body out in a white body bag and she sat in the front yard and watched everything and was it your mother do what who found the body uh supposedly uh a guy named art his name was art he lived directly across the street there's something a little fishy about that guy um him and the the lady that lived next to him carrie and juan gomez um who i mentioned earlier was like a coyote they call them coyotes and they traffic people over the border so he knew people you know to get people back and forth he was from mexico he was mexican um but they lived across the street my dad knew him really well and apparently they walked you know they hadn't seen his car move in a couple of days supposedly and um they were used to seeing them come and go from the house so they actually i don't know it was like they said it was two or three days and then they walked across the street to go look in the windows and they were trying to peek but everything was locked up real tight all the blinds were closed but they could see a little bit through the little you know cracks and the blinds and stuff and they could see the bottom part of what what appeared to be his feet laying in the chair there were black flies all in the windows and in the windowsills so they knew it wasn't good um they knew he was dead because of the flies collecting

around the windows so that supposedly um they're the ones that called the uh police but i didn't get a call from police i got a call from a lady named donna halpin who used to live in art's house across the street this guy art that supposedly went over there and looked through the windows and found this body in my dad's house used that house that he lived in across the street used to be donna happens somehow donna halpin got word of all of this going on across the street at my dad's house and donna halpin the old owner of art's house called me and told me you need to get over your dad's house that's how i was notified so it was weird and you were recovering during this time and you had just lost your son did you have any idea where your son was at this time no i didn't lose my son i had woken up like i said like that from this attempted murder bloated with this infection and i took myself to the doctor and i got treated and it was like everybody acted like they didn't have a clue what was going on my mother acted like she didn't know anything you know my son was brought back to me like that night by my mom i'm going oh god i don't think he expected me to wake up but i did you know so it was like where's keaton you need to bring him home right now you know yeah they did um they did um but i don't think they expected me to wake up so um when i did wake up and i called and demanded that my son be brought back home they you know my mom brought him back home but like i said my dad disappeared my son was with me i mean we we jumped in the car once i got that call um from the uh the neighbor that used to live in that house that i knew um i had sold the house for her so um i don't know how they got a hold of donna and then donna got a hold of me um because i had been her but uh i jumped in the car with my son and went over there so we were there in front of the house when detectives were just making entry into the back doors um to get into the house because everything was locked upwow and when was the last time you had spoken with your father before this since before this instance about three days okay over to the house and he had said you know he was acting like umyou know like he was worried about me um he asked me if i wanted anything from the store you know because i was recovering and i and that's really the last time i talked to him and that was about three days before this body was found in his house so you know other members of the family talking gathering outside of the house that day and detectives wouldn't let us inside so we were all outside and everybody's like we just saw him i just saw him on tuesday i just saw and his body was found thursday night or not his body but a body was found thursday night um and everybody's like we just saw him on tuesday i said last time i saw him was monday so and

there was other people that seen him on tuesday so within two days there's no way that that body was you know decomposed that badly um the medical examiner and even the autopsy report that i got said that that body had been dead for two and a half weeks what was the cause of death on the autopsy report the allegedly the autopsy was uh mostly inconclusive because of the amount of decomposition but it did say that they were able to see some of the heart um and they were able they listed it as um what did they call it they listed the cause of death as uh pulmonary emphysema and um some kind of blockage and in the heart or something that's what it what what his death was listed as and did you get at all to see the body like did anybody was there anybody else that was like hey this isn't him um no not one person ever saw the body or identified the body or was asked to identify the body at all um not a single person in the family and i was the one handling like i was uh through the courts granted like executor of the state or whatever yeah and i'm handling everything because my my my only other biological sister carol had you know moved away 10 years ago to south carolina lived up there with her husband and in-laws so i you know i handled everything she flew down and and stayed for a week or two after that and helped me um but you know then she went back home so i was handling everything myself and and i i there was just a lot of suspicion surrounding you know that death and the timing of it and after my surgery and after my scans and after these things were discovered my collapse diaphragm my you know fractured vertebraes my scar tissue on my hip bones and my you know you know chip in my in my pelvic area so there is a lot of a lot of suspicions you know and a lot of things that were just not adding up to me at the time and and really still aren't i still have a lot of questions i don't know i i i think that he could have been captured after the fact but long after everybody thought he died i think he was still alive possibly um still operating you know doing what he does or um you know once he was eventually captured because i think that they did use him for information and captured him and uh pumped him for information leading up to epstein's arrest sookay and so connect that dot to you um so epstein that happened what we saw in the public happened relatively close um just within a few weeks if i think or a few weeks or a couple months i think you said the time frame what is the possible relationship between those eventsum what the events leading up to epstein's arrest yeah well my dad's death in 2016 that was covered up was one of them and then um in 2016 17 i was kind of summoned to go on a trip to europe um in which i did uh and i was supposed to be over there for like 10 days and it ended up being like two weeks um

because i was being used um i was being trafficked i was drugged in that airplane i was drugged several times throughout the trip but umyeah i was with one of my cousins rhett howard so you know who i started to find out is like known for this type of stuff so i think that he was you know transporting me essentially and and helping them drug me and slip stuff in my drinks so i was being used after that in 2017 and flown to europe and then you know after i got home from europe there was a lot of uh weird things that kept happening my mom's old cia friend roger jenkins i you know i hadn't even been on the ground in florida for 24 hours and i am resting and i've got you know a headache a jet lag you know from flying because it's like a 12 hour flight and you know i hadn't even been home for 12 or 24 hours and and my mom had this guy in my house this guy that you know raped me my whole life this guy that broke my hips as a child three times from violent rape that trafficked me and used me and he's disgusting um he worked in town as a grave digger and a heavy equipment operator and um she had him in my house and i'm going what the hell is he doing here you know so there was a lot of things like that coming back from europe that started to happen you know these certain people piping up and putting their two cents in and coming around asking me questions like who did you see in europe did you see any family over there you know did you just when you were in germany did you i said who are you talking about you know i i just kind of played waited you know played along and just said if we have family in germany i was never told that no i didn't see any family while we were in germany you know so he was asking me all these questions about who i saw while i was over there and i'm thinking i haven't even seen this man in years like why you have him in my house asking me questions about this europe trip you know so all that kind of stuff started happening my mom started entering my house regularly and often unexpected unannounced uninvited real paranoid saying that that body that they took out of that house was too big to be robert there's no way it's him she knew he was still alive um she kept saying that to us and we were like at the time i was like that me uh you know we were kind of calling her crazy at the time like i don't think so but you know if that's true then eventually you know we would have to know you know but my mom started carrying a pistol with her everywhere she went she started getting really paranoid walking into my house like i said all hours of the day and night you know anytime two or three times a day she would come over and just walk in what's going on like nothing what's going on i'm cooking dinner you know i mean she just got real weird i'd come home from being you know at work or out with my son doing

something and she would be sitting on my back for smoking cigarettes i mean the whole house is locked up her car's parked in the front yard and she's sitting on my back porch going what are you doing here you know so it's like odd strange behavior she started getting real paranoid and i think it's because she just knew in her heart of hearts that my father was still alive and the body that she watched them bring out of his house was not his and she kept saying that that body was too big to be robert did you guys realize that at all at the time because i know you said there wasn't like an identification but i'm sure you did see you know if you were out there and there was ambulances you probably did see it being wheeled out um i mean it took hours for them to actually bring the body out it took them an hour to get the body into a body bag because it was so like falling apart you know because of the amount because so you know but then they got the body in the body bag and brought it out i had already gone home at midnight to take a shower my mom is the one that stayed and saw it so i did not see the body that was you know too big to be my dad's i just took her word for it i'm like okay well if that's true you know then then i get i don't know what to do what do you want me to do i mean that's just kind of a that's kind of a crazy thing and at the time i had just gotten out of surgery you know i'm dealing with all this death stuff now my dad became like a really bad hoarder you know so getting into the house paramedics getting into the house being able to move around in there was difficult because it was so cluttered with trash it stunk to high heaven like death like the you know it they had to put ozone machines in there for weeks just to get the smell out um so yeah i mean there was a there's too much going on for me i had to you know get with his family to do an obituary and to do a service and to do a cater and get food and get drinks and get you know i had so much going on while and i'm still recovering in the meantime still recovering um that i i didn't even i didn't listen to a damn thing she said at the time you know so no i wasn't really like highly suspicious at the time i was just kind of going through the motions i guess yeah did anybody ask to look at the body at all and like if they did what was told to them or was it just ignored no it was completely ignored um i think that i even asked like you know am i gonna be able to identify the body um and they were like oh no we don't do that in these cases because they decompose about i always i just got excuses you know and um i i didn't know because we weren't really communicating i had not had contact with my dad's side of the family and probably a year maybe two prior to his death so the first time that i had talked to like my aunt luanne was like the day that he died and then body

was found i'm sitting out in front of his house while the detectives are inside dealing with the death and you know i called her that was the first time i had talked around a long time so we reconnected um over my you know that that day that the body was found because prior to that i had not had contact with them for at least a year maybe two you know my dad was just kind of updating them on me or my in my surgery you know recently yeah but i wasn't speaking to them yeah i mean at that time like i connected with them over over that death and we were able to coordinate his service and an obituary and i got a death certificate but i didn't know at the time like i said because we weren't really communicating that much but if they had identified the body in conversations you know months afterwards it was like no looking back nobody ever even identified the body you know asking around and asking did anybody contact you i mean did no i mean just everything was so fishy about it and it just you know when it's happening like i said you're going through the motions and then you know when the dust settles down and it gets a little calm a couple months later you start reflecting back on all this stuff and then you're like something's not right here you know what i mean something's going on yeah it does it takes months sometimes to kind of like realize that and so your mother was kind of the first one to question it which got you questioning and maybe others if she was explaining that to others what happened after that fact um when you guysit was just her and her strange behavior and her paranoia and the pistol with her everywhere she went i remember taking a ride with her i'm going to walgreens do you need anything i said yeah actually i do i'll ride with you so i jumped in the car with her and she you know got out of the car that just grabbed me this that and the other i'm going to stay in the car and she's like okay well she puts her purse up on on the console and i was like you know my pistols right here in case you need it i said mom we're in the walgreens parking lot what is your problem you know so she started just getting really really paranoid really bad like you know obsessive compulsive type paranoid behavior showing up all hours of the day and night at my house saying what's going on have you talked to anybody have you heard from anybody i'm like who are you talking about you know what are you talking about so she just got really weird um and i just you know started you know showing up in my house and stuff i would like pay her to clean my house because she was a house cleaner you know um i would pay her to watch my dog when i went out of town or you know my son didn't like going to her house because of the you know um living situation she was in so any time that i needed like somebody to watch my son i would she would

come and stay at my house so she had my lock box code you know if she needed to get in or out she had my lock box code i always kept a lock box on my house um with a key in it and then she started making copies of my key and giving them to men these men would come into my house and i wouldn't even know like they were in the house and like oh i didn't even know you know i remember sitting on the toilet one time and looking up going i can't even go to the bathroom in my own house with like you know no privacy i can't even what it's going what are you doing in here you know where they i don't even hear the doorway yeah um one of one of my handlers you know and these people that she knows that she's sold me to so i mean there was weird things like that that that was happening she was giving out my house key i changed the locks on my house four times in 2018 so after you know the paranoia got worse and worse and worse she started stalking me i've had some of her friends tell me your mom is really you know she's driving by your house she's you know using people's cars to drive by your house so you don't know it's her because she won't talk to her she doesn't know why you're not talking to her i think they were afraid of getting caught they think they knew they were like being investigated so you know she was always wanting to get in my house get in my business find out who i'm talking to drive by my house see who's cars in the driveway she was like getting all this you know driving by my house in in different people's cars she was using her friends cars and they were telling me this stuff like your mom you know is losing it she's paranoid something's going on i'm like i don't knowand i don't know what her presence but i want her to stay away from me and i changed the locks on my house four times in 2018 and then come 2019 is when um i got set up through the courts by them because i was not letting her around my son um we got set up at the biltmore in 2018 we had gone to the biltmore and something happened there i'll explain to you about that later but umyeah like i said i changed the locks in 2018 and then 2019 may 4th of 2019 is when they fraudulently removed my son from my house based on false accusations the dcf case they got a a way around the law because they knew that if they opened a dcf case and the invest the case was still open that was the whole key for them was that they had to open this dcf case removed the kid during the open investigation before they had a chance to finish their reports or close the case my son had already been taken the dcf reports when they finally came back in a month later were unfounded but my son was already taken and they kept postponing getting continuances well after six months of doing that they established permanent residency for him in putnam county and considered him a

permanent resident of putnam county after dragging me through the courts for six months but it went on for two years the court hearings postponement post after postponement um it was always delayed the and then it was covet you know and then it was like okay so and anytime a hearing would get rescheduled it wouldn't get rescheduled for 30 days it would get rescheduled for 60 days out so here i am you know six eight months into this and i'm having to wait two more months for the next hearing now you know so it's like it drug on and on and on for two years in the meantime i submitted to taking their mental health evaluations i took four mental health evaluations by people they selected so there was no discrepancy um they kept saying the first one wasn't good enough the second one wasn't good enough they made me take two more one they actually accepted um the other one they said was kind of iffy and i'm going what the hell i mean these are people that you guys are sending me to i'm submitting to your mental health evaluations i've taken four some of them cost eighteen hundred dollars a piece i've got about seven thousand dollars wrapped up in mental health evaluations over the last two and a half years and not one says that you know i have any kind of mental capabilities that i'm not capable of being a parent that not none of that so they all came up and was that where they were questioning the discrepancies because they wanted to see something negative on there and so they kept trying to get you to submit to um yeah and the job allowed it the judge allowed it not once not twice not three times but four times i've taken i've submitted to four mental health evaluations already and all of them came out clear yeah and they keep trying and they're still doing it now that my custody case is closed um you know i sold my house and bureau and i was trying to get closer to putnam county because it's three and a half hour drive so anytime i had to you know wanted to see my son for an hour during a supervised visit i would have to drive three and a half hours to go see him for an hour and then drive three and a half hours back home so it was like eight hours you know of driving for me and i was doing that like at least once a week in the beginning for months i did so many of these supervised visits under um these people you know that were supervising for them that were you know getting paid to set me up through the family resource center in palakka it's the only uh supervised visit place in putnam county and they made it so difficult um that they they accused me of doing all kinds of stuff they told me i was not allowed to record and you know i told them i know my rights like i can record here this is a public building this is you know where no expectation privacy you guys have a camera in here i'm allowed to record the papers

that i signed did not you know for the visitation did not say that i wasn't allowed to record so they banned me from the building and now my son's father is refusing to bring him like out of the county to go bring him to a supervised visit in a different county because it's too far away it's too inconvenient for him so because of that i haven't seen my son in a year now and they're blaming that on me so now that they didn't get anywhere with the custody case and trying to pin you know criminal charges on me and trying to pin mental problems on me trying to get you know they didn't get anywhere with that with the custody case now they're framing me for criminal accusations um i had not been on my property my new property in north florida once i sold the house and bureau and i i found a property closer to my son that's about 45 minutes away from calaca versus three and a half hours away um i hadn't even been on that property but i was required to give them my new address at the end of my custody trial they you know they said that you know you've moved we need your new address so i was required to give them my new address so they had my new address and they're the only ones that had my and then like i said i hadn't even been on that property for a month maybe two um i started getting harassed their cops were showing up i would be working out in the yard and you know it was a fixer-upper that i bought so i'm restoring it and i'm putting sod down and i'm working in the yard and doing a lot of junk removal and cleanup on the property so i'm out there working and every time i turn around it seemed like a cop was pulling under my driveway oh anonymous caller you know we were just checking on you saying that you know you're suicidal you're having some mental problems and i'm like no i'm out here lance odd dude you know like what do you you know so it's like six times in a month these cops showed up and two of the times were to serve me papers and i'm going what is this for so he goes over the paperwork with me and he's saying you're being accused of stalking and having this silver revolver pistol and and having mental issues so now they're trying to frame me in criminal court now they didn't get anywhere with family criminal stuff um but they're trying to frame me with um a silver revolver pistol that i don't have calling in anonymous welfare checks girl they had every department out there to my house they called the police department multiple times they called the county code enforcement and permitting department multiple times because they knew i was doing work out there they knew um they called they even called animal control my lit my dog got a ticket like the first month we were on this property she wasn't on a leash but she was on my one acre of land you know but she got a ticket for not having a leash on or

whatever you know not being leashed or whatever so they were they're messing with me and that's what they do you know they'll they'll target you they'll start calling in you know code enforcement violations they'll start calling in your dog your animals like they'll just do anything to target you that way and that's what was happening so i fled um when i sold the house and bureau i didn't have a place to stay so i bought a travel trailer and i was staying in that um when i purchased the property up in north florida there was no power to the property at all the lines had been cut because it was like uh you know it was like a hazard out there when i bought it it was a fixer-upper and the power had been removed so i had all the utilities restored underground utilities and everything piped in so for the first two months that i owned it i wasn't even staying there i was staying in my camper you know in a campground and then once i got power on the property moved my camper over to the property is when all that started happening so i was still living in my camper i mean the cabin hadn't even been restored yet i was still working on it but because of all that happening and me being you know targeted like i said every time i turn around i'm you know cops are pulling my driveway or or the damn uh county permitting department code whatever or the animal control you know i was just being messed with for the whole first month that i was on the property so i just left you know i kind of stopped construction um i shut everything down i put some surveillance up i've got some neighbors some trusted neighbors that are looking out and um you know helping me out with the property and maintaining it mowing it and stuff like that but i left i had to leave i'm staying in my travel trailer and i've been staying in my travel trailer now for about a year so that's where i'm at and why is that that you had to leave were you were they invading you on your on your property um several times men had entered my uh entered my camper in the middle of the night um you know saying saying things to me um you know one of them held me down in my bed like face down with his hand on the back of my neck i couldn't move or i was screaming as loud as i could my neighbors did not hear me um it was scary and i was screaming so hard and so loud and i was crying and my face was red and i had tears and i mean i was screaming as loud as i could and nobody heard me um they left and they left me alone after that but i have been you know back to the property to check on it here and there and one of the times that i did go back to the property i stayed for a couple of nights and somebody did enter the property so i believe um you know the property is being watched you know that's the address that they you know they have and i was required to give it

to them through the court so i i think that property is being launched there is in a lot like the the property is in clay county but there's an alachua county sheriff's cruiser that is sometimes parked directly across the street from the property um that i think is being used as a plant because it's an out of town cruiser you know i mean and they use you know sheriffs all the time for this kind of stuff um gang stalking or whatever but you know they could have paid his lease for a year across the street from me and moved him in over across the street and parked his cruiser there or whatever but i know that the the sheriff that has the electoral county cruiser across the street has been seen watching meso i think he's a plant so i think they planted somebody across the street there has been people that have entered my house um and my camper and you know held me down in the bed with my face down and their hands wrapped around the back of my neck i have and you don't know that was no i think they're my handlers you know and um you know i have been stuck in the in the leg with a needle you know and then i wake up and it's like nobody's there the house is secure the dog's asleep so it's like nothing ever happened when you wake up and you're like what the hell happened last night what the hell is going on you know so it's scary for me i got spooked and i left and i'm not staying there anymore because of that i don't want to get drugged in my leg anymore i don't want people watching me and i know that that property because i was required to give them the address in court is being watched soso i'm not there i'm actually out of state in a secure location and i'm on private property right now so i haven't been messed with a whole lot here but my car did get smashed in the parking lot the other day i don't know if that was intentional or not but with all this going on i i tend to lean towards you know somebody's definitely following me and i don't think that things like that happen accidentally i think it was done purposely to let me know or warn me possibly like and it was a hit and run right yeah i filed a police report because i had to um you know to give to my insurance company but yeah nobody saw a thing conveniently i mean there's like people all around the parking lot but nobody's all things thoughwow i'm so sorry that happened to you car trouble is so frustrating yeah no it's not the first time that's happenedand so going back to you um i know we were talking about um epstein a little bit ago i wanted to ask you we have the big trial coming up this week i wanted to get your thoughts on that um since your insight on that is vastly different than than most people and i wanted to see what you think about uh maxwell and what's going to be going on this week and even some of the things that we've been seeing with distractions coming up maybe pulling people's

attention away from that elaine's trial yeahum i don't really know what you want me to elaborate on like what about like the whole i who knows what they're going to put out in in the media you know who who knows what is actually going to be covered yeah i mean i don't really know what they're going to say do you think that she has some type of immunity and that a lot of it's for show or do you think that there will actually be a chance that something could happen as happen as far as her getting locked up or some progress and i know she's already locked up but like actually um criminalized and penalized for what she's been kind of holding off doing a trial for i think i think i think so i've seen a couple of the articles about how she's trying to get you know like don't call these people victims like she doesn't want these people being called victims she doesn't want that language and in there for a reason um i think that being from a foreign country she'll probably try to pull the same card you know jeffrey did about you know not being from here and that's against my beliefs or that's not my religion that's not what i believe you know she'll probably try some of those um tactics like you know i'm not from here um i just know from being a little girl and being taken on maxwell's yacht her father um and and being naked being forced to be naked i didn't want to be naked and i didn't understand why i had to be naked but i was you know forced to walk around naked there were older girls around me i was the youngest one um i was the baby they would call me the baby not you know they were it wasn't a baby i was the baby you know and umgalain would basically groom girls like for her dad i remember being taken by her we just i didn't know how to say her name elaine when i was a little girl i would call her g you know and a lot of people did that was kind of like her nickname like and um i don't know she um she grew up in an occult family you know it's a very normalized behavior for her uh you know sex and you know nudity and just you know uh porn and you know just you become desensitized to that when you grow up around it and clearly she did and then she became a handler herself you know and was grooming young girls for older men you know and the men that she struggled with so umgrowing up like that there's a good chance that she really didn't know because she was never taught and she lacked proper leadership in her life and you know whatever i mean there's things that i mean obviously she knew what she was doing was wrong and she continued to do it um but i think she's gonna use that as an excuse like oh i didn't know you know because this is how i grew up and this is what this was considered normal for me and this was you know this was the society i grew up in and you know i think she'll use that a lot like oh i didn't know

this was wrong type thingwhat do you think actually happened to to jeffrey too do you think that he is still alive do you think that there's another purpose for the the story that we were told or do you think it's accurate that he actually killed himself no i think he's aliveand what would they use him for if he's still alive why would they keep him alive or what's the purpose for that why not just let him be alive and be jeffrey epstein um you know because i think they have to push the narrative that he's dead he's kind of like dead forgotten about you see all these other people you see bill gates and all these people being asked in these interviews on these shows tv shows you know what do you think of epstein and oh well he's dead now he's like so we don't have to worry about him you know that's kind of like their response to and it's like i think that's kind of part of the um you know part of the investigation part of the setup part of the you know what they're doing to try to infiltrate from the inside i believe that there is some internal investigations going on and they're called it was explained to me there's a difference between a covert operation and a clandestine operation it was explained to me that covert operations are basically like operations that take place that people know about and even publicly people know that there's an investigation there's an operation going on uh the clandestine operations it's like nobody knows that they're going on so i've been told that there's been a lot of clandestine operations uh going on over the last couple years which um are things that i've been used in undercover you know what is a clandestine operation it's an undercover operation that nobody knows is even happening okay you know you could be a part of it not even know that you know you're part of the investigation or you're part of gathering intel and not even knowing like you're not informed people won't even know they're going on and it's called clandestine operation you can look it up and it was explained to me that that's what it was and what's going on and the difference between covert and clandestine though and now you mentioned galen grew up in a cult do you know and you were also do you know um what cult in particular i'm guessing that there's there's names for some of them do you know which one she was in or the one that you were raised in no no i just think it's a cultism you know it's not like the specific cult it's just a cultism um these are occult families that do practice occultism and these types of practices and things um i just think that she she grew up like that like i said naturally a lot of the royals british people um europeans they all grow up you know they don't sexualize nudity you can go down you know to various countries and you'll see you know boobs and butts on tv that they don't show you you know they're censored in the united states but

you can watch tv and other countries and it's like they don't sexualize nudity it's like nudities everywhere and it's no big deal you know yeah and now talk about the the royal family a little bit um buckingham palace i know you mentioned last time having had some affiliation with that family would you be able to elaborate on some of your experiencesbeing taken there yeah or any you know interactions with any of them that are in that family or some insight for people i had a few people reach out and ask about that in particular because i think that's kind of unknown you know we we know prince andrew we know epstein was involved with that but there hasn't been a lot spilled about that family as far as um you know i've seen well that's the thing i've been taken to the palace several times um a lot of times when i was around these people it was not in the palace or in the palace setting either formal settings like that they they were um a lot of people don't know this but the royal family does and has over the years rented estates in the united states like the biltmore they will rent the biltmore um to do uh you know satanic worship and ceremonies and gatherings and initiation ceremonies and stuff like that so they do rent these places like the biltmore private estates you know and and they do come over and do that i've seen them on the islands um you know they'll fly privately to the islands or maybe they'll get in underground through a tunnel so nobody knows they're there um so it's like more secretive type settings like that i mean like i said i have been to the palace i you know how i was given etiquette classes you know so i didn't embarrass them at dinner with these people like i you know i do curtsy to the queen i i've done all that i have been been there and stayed there i was forced to stay with charles one night alone like in his room and i was raped by him um all night i was raped in front of diana um you know and grew you know they were grooming their their children showing their show that's how they educate their children essentially about sex and sex education and bodies and women and the difference between boys and girls like you know it's just like get naked and we'll show you type type attitude you know like they they use the the girls to groom the boys and you know they were like practicing making the boys practice showing the boys what to do how to do how to do it you know they would tell themi don't know i mean i i was being raped you know like i said in front of diana and then you know charles would tell her like that's how it's done you know like i don't know insinuating likeshe she didn't allow a lot of the aggressive natured rape type stuff and in bed you knowwhat happened are you did you have personal encounters i know you said diana was in the room what are your thoughts on her in particular and you know her her fate ultimately was she

involved was she good do you think she um participated in this do you think she wanted to get out what was your vibe on her being around her in those situations i remember like you know being hurt i was being you know raped by my handler and while while we were there at the palace and i remember like escaping him you know and i'm in my little white t-shirt and i remember like running into the kitchen and she was in the kitchen um she was like upset visibly upset about something you could hear in her voice and the way she was talking i don't remember like what the whole thing was about but i remember her being upset and then you know i was telling her that i was hungry and she gave me like a snack that was on the counter she kind of flipped it to me and told me to like shoot me away a little bit like okay you go over there like go you know here's your snack go but she tried to help me um i remember you know being raped in the same rooms as her you know she was being used by some of the other men in the family as well and yeah i mean it's you don't have a choice you know women aren't really given a choice and umyeah i remember being in the room being raped and her being you know on the other side of the room being raped also so there's like nothing that you know she could do about it she tried to uhi i i think diana was good i think she wanted out of it i remember hearing charles tell some of the men you know that he thought he got himself like a virgin like he thought he got a virgin when he married her and then he ended up finding out after they had wed that her dad had been using her for most of her life like you know for sex or whatever occult practice i think she came from an occult family but they kind of you know sold her off to charles like as this virgin so he thought he was getting a virgin i remember him saying things to other members of the family like i thought she was a virgin when um you know one when i married her and then i found out you know her damn family's been using her all along so it's like i don't know just weird stuff like that i remember them you know saying it justkind of makes me wonder about like you know the um afghanistan's believing in allah and getting like you know having these virgins and whatever there was like something significant about her being a virgin or whatever and then he found out that she wasn't a virgin because her you know dad or her family had used her or whatever so i remember that and there was like animosity between her and him you know i think specifically because of that i mean i think he just kind of looked at her like you know you're not who i thought you were or whatever you know who all in that family are you um did you have encounters with that sexually abused you um andrew mostly because he would go you know to the island i remember telling him one

time his breath stunk when he was you know raping me using me i was with my handler and they were like they were all you know participating in this like open gay sex like everybody would be naked i remember being in the bed with my handler and andrew you know and my handler telling me to get comfortable with him and to do the do do to him what you do to me you know like it's okay you know trying to really get me you know comfortable with these other men and andrew was one of them and i remember you know telling him his breath stump i was a little girl you know i mean i was five six seven eight nine years old you know when all this first started taking place all the way up into my teensand are there have you had any experiencing have you had any experiences seeing the tunnels that are allegedly under the uh the palace i'm assuming that's how they got me into the palace um was probably underground you know they got me into a lot of places underground just so that we would avoid um you know anybody seeing us i remember um being taken on like these back roads on the way back of these you know hundred acre ranches and estates like you you know i would be taken down like these back dirt roads real secluded and then you know my brother handler would be there with like a dirt bike and make me get on the handlebars of the dirt bike and ride me through the woods all the way up to like the back side of the property because there might have been like cameras or something like that that were going on out front that they didn't want anybody to see so they were like sneaking me um you know on dirt bikes through the woods through you know underground and all kinds of different ways to get into these properties without being seen so i remember you know going and showing up one time and then you know him kind of handing me over um to the guys that were using me and saying sorry she smells like gas i had to ride her in on the motorcycle you know because i had smelt like fuel when i got in there from riding on the dirt bike through the woods to get there so it was crazy stuff like that i was being snuck around a lot i was being put in um you know disguises i would be you know my hair would be put up into a cap and i would be you know dressed in boys clothes so i look like a little boy instead of a girl um yeah they were changing my appearance and my look too they would put me in a wheelchair and make me look like i was like handicapped you knowwow were you ever flown to epstein island yeah yeah where is there an underground system there also i'm assuming yes but i mean on top of the island it doesn't look like there's a lot right but we know a lot goes on there do primarily are there a lot of people and events underground and everything above ground is for show or is it are there different things that maybe the

public hasn't seen that exist on that island above ground yeah of course there's underground tunnels there umi've been in so many tunnels i don't even know what was what but i know they're there you know i know people were being brought in that way and by plane it's the only way to get to the property is either by boat by plane or underground submarine and the water i know personal experiences with epstein oh yeah oh yeah i've known jeffrey since i was a little girl he's raped me a lot um i remember being on the private jet and we were i was with my handler and i i was kind of known for being like a mouth you know and being kind of mouthy and i was on the plane being mouthy and i was probably like 10 9 10 at this time but i was talking to him about something and then he just kind of he didn't even respond like he responded by punching me in my face so my so i flew into the plane window you know my head hit the side of the window and everything and i just you know kind of cowered down and crumbled and like started crying and then my hand was like what the hell did you do that for and i remember my handler got up and they got into a fist fight on the plane in the middle of the aisle they were like beating each other up over over him just punching me in the face like that for really no apparent reason so yeah stuff like that he was violent um and no i think he lacked impulse control so they were like he was just really messed up i think from his own abuse and torture that he really lacked impulse control he you know like you know empathy and things like that he wasn't like an affectionate person he's just raped you know which is just i've had a lot of experiences with him i mean at times i remember like telling him i'm a little girl and i'm going you know i'm you know i remember telling him like i'm human too you know i'm human too and i'm like trying to tell him as a little girl you know that i just wanted to be treated like a human too because i would be at the properties andyou know when a time when it came time to like to eat he would just like throw food on the floor and i was so hungry i would like go get it you know so i was like on my knees crawling around like getting all these droppings he was just kind of throwing on the floor and it was more like a joke you know he kind of you know they were laughing about it and oh look you know she'll eat it right off the floor you know like i was this little puppet and this little dog that was hungry um stuff like that yeah i mean he wasn't very nice to me over the years he became a little bit nicer i think um you know but it but it didn't matter and i've seen him in titusville on nasa property i've been taken to nasa property for what they told me was a camping trip i was invited by wayne nighty jr we call him jr he lives in titusville i grew up with him my whole life he's from a big

occult family there and they have ties to nasa and grumman and gary kimball who has the private airport that jeffrey was playing in and out of so i was invited by uh j.r um to go to camping one weekend so i thought i was just going camping with you jay and end up at this property and it's on nasa property so it's like you're not getting in there unless you have some type of clearance or you know somebody and he knew everybody so we got in without any problem i didn't question and i just like i said thought we were going camping in it you know jeffrey was there there's a lot of big people there um and i ended up being drugged in one of the campers um there was a lot of people out there camping it was campgrounds you know um and i ended up being drugged in one of the campers and and raped gang raped you know men were coming into the camper raping me and going out and the next one would come in they were doing that to me all night while i was drugged in this camper and then i remember hearing like men come in and saying uh which side because they had me on one side and a dead girl on the other side and i remember like hearing my handlers joke about oh the dead ones over here the live ones over here so it's like you could you know the men that entered you could either go you know have sex with the corpse or they could go have sex with the the live one over here and i was the live one so apparently on the other side of the camper um there was a corpse that they were using so that happened on the nasa property in titusville that i was taken to when i was you know thought i was going camping with jr so that's horrific and abstinence there for thatand so not just on his properties but you know in in brevard around nasa around nasa space science crew a lot of my handlers were nasa space science crew they were into you know skydiving base jumping all that adrenaline junkie type stuff and um navy seals and you know and see earth air land in space that's what they doand what about disney i know that that's a huge hub especially in florida california also what happens at disney that people aren't aware of i know you mentioned that you've also been uh had experiences there also the underground porn mostly um they were you know into entertainment that was more of the entertainment you know um you've got different divisions you know and that was more like the entertainment division so you know we kind of bounced around to them all but that was you know where i was used a lot and the underground porn the satanic porn the shows the you know the on stage performances and performing sex live in front of an audience and you know things like that i would be forced to participate in those but those were being filmed a lot of the porn was child porn especially was being sold overseas because of

the walls here so they were filming it here and then shipping it overseas to be sold so i know some of the porn that i was used in as a child was sold overseasfriends that not disney but what is kind of the structure of hollywood because i know that there's always people that that sit at the top were you ever um did anybody ever tell you or did you ever have experiences with high up in in hollywood and in disney and in the entertainment industry i've been around the family you know that owned viacom that owned cbs network that owned nickelodeon that own um what are some of the other ones there's there's more but those are some of the main main ones um but they have they're huge conglomerates i mean cbs network owns like hundreds of other corporations they're all you know it's a conglomerate so they're affiliated with a lot of things and a lot of different people but yeah i've been around the families that that own them and that know what's going on within within the networks they're not necessarily like on set while they're filming but they certainly see what their companies are producing yeah and where you had mentioned last time i didn't get to get in to this part with you but i'd love for you to talk a little bit about uh you mentioned mk ultra and that you've had uh you've been programmed with that experimental um i don't even know what you'd label it mind control yep where where did that take place and when did when did you become aware that that was something you had experienced um that took place in my you know i was very young four five six years old is when they started programming me and i think i was five when i got shipped so for global tracking through the programs and they were um they start programming you you know from the time you're young and they use gas they use hypnotics they were using a lot of hypnosis a lot of that type of you know stuff for mind control they were using um you know a lot of illusory setups and things like i remember goingthey train you know like i don't know i don't know how to explain it but they would put us in thisroomthat was like dimly lit with like a blue light or a red light or it was you know different color lighting um you know they have they had all that stuff that they were testing and figuring out with like your brain and different sounds and frequencies and touch and you know uh eyesight and hand eye coordination type stuff whatever they were doing but i remember being like put in front of this machine that was pumping out bullets like actual real ammunition being used to shoot at these kids and we were being you know taken in a line and it was like you can kind of see you know the person before you go ahead and they're jumping around trying to dodge all these bullets and you don't know which ones are rubber or which ones are real so they were making us

like dodge bullets um we were very young and there was a lot of kids that got shot by this exercise like right in front of us some of them died some of them you know recovered it just depends on where they got hit if they got hit in a major organ if they got you know i mean they always said to protect your head and your heart which are your two vital you know it's you know if you get hit in the limb you'll you'll survive but if you get hit here or there so they were making you like stare at these machines and watch these bullets come out and try to dodge them you know like i said you didn't know which ones were fake and which ones were real but people were getting shot and some people were getting killed right in front of us these kids and what was the purpose for that experiment i don't know some kind of ballistics training and being able to actually like see bullets coming um to see them coming and to be able to get out of the way they were using like heat seeker uh goggles where you could actually see the trail of the heat from the bullet you know coming from hundreds of feet away they were you know what i mean stuff like that so they were training you and programming you and you know to be able to do these things the mk ultra like is that as a manufactured killer and they were like teaching us ballistics how to dodge bullets how to see them coming how to you know do crazy [___] like that a lot of kids were killed in the process because they didn't get out of the way fast enough they didn't move you know uh quickly enough and those were the ones that were kind of like considered like the bad eggs okay the ones that don't survive are the ones that you know can't can't be a navy seal or they can't be you know whatever whatever it was they can't they're not gonna make it you knowthere are experiments or any other types of training that they would put you through or others through oh yeah that umyou know a lot of shooting a lot of um grappling wrestling things like that and then we would practice at home not just that these programs they would teach us in the programs they would tell us things in the programs that we have to go home and practice um i used to kickbox a little bit and uh you know my brother trained me up in um mixed martial arts and things like thatwhen i was young wow probably before my legs were broken too so um you know i was able to do a lot of that stuff before my legs were broken and then and then after i i mean i still did a little bit of it but yeah i mean they would use me for voiceovers um and movies and scenes they so that you know they would use your voice they would get you to sing and perform um you know a lot of these people have really good amazing voices and they like have these like huge lung capacities to be able to like belt these you know notes out and stuff and a lot of that is from like screaming you

know and and i've had voice lessons and all kinds of stuff that they put you through and but a lot of that is from like screaming from torture like really letting your voice go you know what i mean so that was kind of a practice um you know being trained with your voice uh crowd control a lot of them were trained with crowd control being able to you know control a crowd these guys were you know a lot of them were involved with the coast guard and things like that where you have to be loud and you have to be able to control a crowd in an emergency situation things like that so yeah a lot of that i was around a lot of navy seals on and off of ships um flown in tons of aircraft i've probably been in more aircraft than most military personnel and probably been on like 32 helicopters i've been in all kinds of private aircraft air force one helicopters apaches you know i mean you name it i've been in aircraft carriers on naval ships all kinds of stuff and i know last time we touched on dissociation and uh dissociative identity disorder how have you managed to work through that from all these different types of traumas that you've endured well i say i have dissociative disorder but i was never really like properly diagnosed with dissociative disorder i just know that i can dissociate with my bodyreally um but how what how have you healed from that i know that's something a lot of survivors of all different levels of trauma but specifically satanic ritual abuse mk ultra can have a much more severe effect on fragmenting the brain especially as a child um how what are some because you're so you're very well spoken and um you seem to have a good handle on that are there things that worked for you uh coming to terms with that and making sure that it doesn't happen all the time or that you have more control over it and different things that you've used to heali just think that i'm desensitized to a lot of it i'm informed i'm educated i'm experienced and i think that has a lot to do with it staying away from uh you know the programming um that's on tv like i said i don't allow tv in my house so i don't i don't anything that you see on television programming is programming you know so i stay away from the programming you know i know what's going on i know what's happened to me i know what i know and that's that's kind of why i feel like i i have a solid foundation and i had a brother and a handler that did care about me and does care about me and you know has helped me through some of my worst times like i said when i was 11 12 years old i was suicidal and i wanted to die and he really um had already done all you know he hadn't been through those phases you know being 10 years older than me he had already been through the you know the realmajor depression and stuff like that and he's the one really that just you know kind of made me look at it

from a different perspective um everything is perspective you know and it's kind of like if you know if you look at things a certain way and you know you don't like it and it's not uncomfortable for you he taught me basically like all you have to do is just change your perspective you know change your perspective about what's going on around you and it won't affect you as negatively um look look for the positive in it you know look for you know you're still here and there's something to be said about that so i mean he just really taught me how to kind of dig deep and really look at the positive side of it which is what i've done and that's how i made it through basically everything that i've been through is just okay you know i'm still here and there and that's what's positive about it so i'm moving forward i just i don't know just trying to find um meaningin my lifelearning um how to heal my body like i said with herbs and natural healing techniques and um learning you know yoga and breathing techniques you know to to calm you know you know to just counter any types of anxiety that might come up i deal with anxiety all the time but then i also practice silence a lot most of my days are spent in complete and total silence without a radio without background noise or tv running or anything i i practice silence a lot um i meditate i pray umand i do yoga i'll you know just walking things like that i mean just just trying to get through it make sense of it all yeah do you get flashbacks often now that you were dissociated from whenever you were younger that you have to cope with and process all the time yeah all the time i um i've been awoken in the middle of the night from these flashbacks you know i've cried i've hyperventilated i you know just sick over it yeah i have flashbacks absolutely i mean i think that's normal yeah how do you get that cause that has to be so horrifying just remembering something that you weren't conscious of before and then having to process that on your own especially when your body's reacting to it it's hard but i realized that it's a process and that it is part of the process so it's just a matter of like really going through it and just knowing that it's part of the process and that's kind of what keeps me strong is just knowing that this is a process and that this is all part of the process how do you handle when people try to discredit you because obviously you've you've went public recently with this and there are people that come after you and say that what you're saying is not true or they want to and they're most likely um i think you would probably and you might know different but i'm assuming that these are probably people that that don't want you to talk or that don't want this information getting out there how do you handle that and what has happened since you started coming out and how do you handle that well i think for people that

have like a public persona and this image that they want people to you know think about them um or that you know this image that they they people try so hard to maintain in a in a public you know setting or to the public um people like that that you know that work hard to push this idea of who they are don't want their dirty secrets being told they don't want their past getting dredged up i mean i don't either you know and there's things in my past obviously that are horrific i don't want that getting drug up but the truth needs to be known and i i'm very transparent and i'm an open book so it doesn't bother me um they can say whatever they want there's a lot of people that you know have been around my family or certain members of my family but they haven't really been around me um so they might think they know me or my because you know they've been affiliated or associated with my family over the years but they don't really know me um so it doesn't matter to me what they say i just you know when i see anything negative i just block it now and that's kind of how i deal with that i just you know i block it and i ignore it and that's that i'm i'm i'm doing what i have to do for me and my son and you know i'm speaking out because the truth needs to be known i i want people to know the truth about me and who i am and and where i've been and what i've been used for um it's been a long time coming you know i'm 37 years old and this has been going on my whole life and you know all these events leading up to jeffrey's uh arrest and you know in 2019 and and all the things that have happened to me leading up to that also like i just i'm ready for this part of my life to be over you know i'm ready to move forward so i'm not i i don't feed into anything that they say i've been discredited my entire life i've been around people that don't know me my entire life and don't know where i've been or what i've been used for you know my parents were divorced so there was like people that you know oh i've known kaylee your whole life uh no you knew my dad but you didn't know what he was using me for outside of you know your family holiday i mean a lot of these people and there was one that was saying that she was like my cousin or he was my cousin i have no idea who it was um but there was a lot of people we were around and we were forced to call them uncle so and so or aunt so-and-so or cousin but we got cousins everywhere that i don't even know you know they're supposedly my quote cousins unquote like i don't um i don't spend any amount of time with any of these people so nothing that they have to say about me really even matters it doesn't bother me that's an amazing attitude because that can be i'm sure really discouraging um that's been a topic with other survivors of just you know it's hard enough to come tell your story it nobody wants to have to

talk about this stuff but when you do decide to talk about it you get people that combat you and it can be really hard to process that so i think it's great that you're able to feel that are targeting me are people you know in law enforcement or they you know they are in this network of law enforcement judges and attorneys and things like that so they're using like the law oh she can say all this stuff but she has no pictures or proof or evidence and although that's what that's what i saw in some of the comments and i'm going you know when you wake up drugged and strangled with fecal matter in your bed i mean i'm sure they're not you know you know nobody let me keep any pictures of that i'm sure you guys have it all but i don't have that i mean nobody gave let me have the pictures i know evidence like i said has been obtained and dug up out of the backyard that you know that was buried in a safe that was in the backyard there's pictures there's videos there's floppy disks back from the 90s they were storing this kind of stuff on there's all kinds of stuff that has been obtained i was i was denied access to robert my dad's uh safety deposit boxes after you know even though i was granted executor of the state by the courts they denied me access to two of the safety deposit boxes that i know evidence was being kept and so i know a lot of the stuff has already been obtained and then like i said these were the events leading up to jeffrey's arrest so once jeffrey was arrested i know even more information and evidence has been obtained um but there's a lot of people from vero that are like oh she's crazy she was never trafficked to epstein but they have no idea that i was trafficked that i've seen and that's the problem with them is there's so much that they don't know they think that they know me because i was trained to go back to vero and act like a normal member of a society and like act like i'm from this normal family and you know i was trained to do that i was trained to you know play both sides of the fence i was a plant a lot you know around a lot of my fake friends um you know that were involved in this type of stuff and i was being used to gather intel and to get close to these people's kids you know things like that so i had a lot of fake friends people that think they know me but they have no idea like who i am or what i've been used for or where i've been yeah so that's fine like i said there's just a lot of things that people don't know and think they do so yeah now one of the things you mentioned earlier that you said we'll talk about later um i didn't want to forget it was you were talking about biltmore um what happened at biltmore um i i went there with uh my son and with my mom and i was like ambushed while i was there um i think it was my mom's job at the time to like get me there and she did i like the boomer i like going to visit a little more um but you know

i've been taken to biltmore before throughout my life as a child prostitute and you know i remember swimming in the underground pool while i was there and remember you know being raped by cult members and being used in ceremony and ritual andumthere was like a setup you know they knew we were coming so they had a crew there and there was people there one of them had like this huge mohawk it was like a black mohawk that stood like a foot and a half tall they were dressed all likegothic like i don't know it was just really really like edward scissorhand type stuff i feel like it was just really weird it was like a scene in a movie you know and i'm being told that they're filming and they're filming this movie and you're gonna be in and i'm like what are you talking about and i'm going what the hell is going on and then they made us like sit at this table so my mom is sitting on the other side of the table for me and they're like forcing us to have this conversation and i'm going what the hell are you trying to say and then he's and they were telling my mom like tell her go ahead tell her go ahead and tell her so my mom like went ahead and told me because she was being summoned and told to tell me the truth and i you know with my eyes open right there in front of everybody and my mom told me at the table that day at the biltmore um that she had been using my son and i got irate and i know they were filming but i got up immediately and when i did my chair flew back because i got up really fast and my chair fell backwards and then i picked up the water that i had in front of me and i threw it in her face you know and then i took the glass and i slammed it on the table so they have you know they have whatever video or whatever of me acting like that you know because of what she had just disclosed to me and this setup at the biltmore it was it was insane it was absolutely insane and then i remember being followed and told don't look behind you just keep looking straight but they were behind me likely filming but they walked us basically all the way back through the estate to the car parking lot and once we all got in the car they drugged us you know so it's like they put us to sleep and then when we woke up it was like we woke all woke up in the car and we were like okay yeah okay well let's go into the the winery now you know so it's like it was almost like one of those things that it was just a setup and that's how they do it you know they made us all get into the car so that when we woke up in the car it was like nothing ever happened and they were gone you know and what would they drug you with a lot of times they they have a chloroform like these little glass jars of chloroform and all you need is a little bit of that stuff and put it over your face and you breathe it in one time and you're out you know and they know i think that when they put you to

sleep using certain chemicals um or gas they'll put a like you know a gas mask on your face or whatever knock you out or stick a needle in your leg so whatever whatever they're using they have anecdotes for and they can wake you up just the same they can put you to sleep so they'll wake you up and put you to sleep wake you up put you to sleep during these uh setups so that you remember certain parts but you don't remember the parts that they don't want you to remember you know because they put you to sleep and then they wake you up and then they put you to sleep again so it's like you get little um you know portions of what actually happened it's like what you remember and then you try to piece it all together yourself after the fact it's sick and it's been going my whole life it's been going on my entire life i try to ignore it whatever they're using me for whatever their you know whatever they whatever they're trying to do i just i just try to ignore it and move forward like okay you know sometimes i'll wake up and like peck myself and pinch myself make sure i'm still alive oh i'm sure i can't even imagine god i would be like let's go eat some dinner or something let's just get this out of you know get this yeah it's it's freaky it's weird um and like i said these people show up unexpected unannounced and uninvited did you ever have any encounters with the the vanderbilts um you're younger or the coopers at all having that got a lot of affiliations with cooper's because uh david jay cooper was the pediatrician that would do house calls um he would come and treat us at home you know for infections and give us antibiotics because he had access to all that but he used me a lot for rape and in labs and for torture and experimenting different medicines and infecting me with certain infections to try to find cures for them and things like that you know so there was um what inspections uh just gosh anything i don't i don't even know um to be exact but just everything i've been so sick before with infections and things that they would put in my body experimenting with me i've almost died several times from being you know sick from an infection but just anything i mean it could be kind of drugs it could have been a new drug that they were trying you know yeah would you be in a lab during this time or did they do this while you were at home and recovering from being sick from these things both um both but i would be put in labs when i was a little girl um hooked up to machines and left there for hours where you know with like this i don't know i hate to say it but it's like a dildo type thing going in and out of me for hours they would just like rape me with this machine for hours it was like this chair that they had with a dildo on it and i would be strapped to the chair i wouldn't be able to move my brother would sneak my handler he became my handler he

would sneak into the lab and get me out of my straps and get me off the machine he's like i remember him telling me like he's not allowed to do this you know this is a university these are labs that these um these guys are doing this stuff in and i remember there being a huge discrepancy on my brother trying to get me help saying he's doing this to her he's not allowed to be doing this but he got a he got away with it you know i mean he got away with doing a lot of stuff like that saying that he was doing experiments i don't know i mean because i was so young i wasn't like orgasmic i don't know if they were trying to make me orgasm or whatever they were trying to do with you know my lower extremities and my you know orifices i don't know but they were doing some really torturous things for hours at a time i would be sore i would have a hard time walking i was a little girl you know like i said five six seven eight years old being used for this kind of stuff um and strapped down so it was sick real sick um satanic just torture and they just didn't care i was like ah he'll be fine you know kids are resilient you know they just they don't they don't it's not like a loving nurturing environment at all it's very dangerous you know when you step out of line or you say the wrong thing you could get killed very easily you know whether by drugs or shot or you know just left somewhere that's very dangerous environment what do you recall about these ceremonies and satanic rituals a lot of people have heard of satanic ritual abuse but not many have experienced it um or have have learned what happened do you have some recall on memories and and how that works during a ceremony yeah i am would be taken i remember going on a trip to west virginia with the uh diana knightie canada uh wayne knighty jr jr all these um it was his mom and her family they were from brevard county but they um had family up in west virginia that were like practicing satan as an occultist and i remember going up there like they rented a car packed all of us into this car and there were so many of us there was people sitting on each other's laps um diane's brother his name was jim was like in the back seat with my brother you know forcing him to perform oral sex in the back seat like right next to everybody in the car in the middle of the car just whips it out makes my brother get on the floorboard as a little boy you know with his head in his lap doing this in front of everybody it's just like nothing nobody said anything nobody stopped him um but that was on the way up to west virginia so that they could do their ritual or whatever it was it was some kind of big thing that they were doing and there was a lot of people gathering for it so when we got there we stayed at his aunt libby's house or something whoever it was up in west virginia and um i remember being taken downstairs in my

white t-shirt and being bent over the table and raped and i'm on the same table it was like this huge dining room table and on the table like my brother was strapped down arms out legs out butt naked on this table candles lit you know all around the room there's men wearing garbs and black robes with hoods some of them had masks on some of them had like you know some people bring their like um i don't even know what they're called but they would have these like big posts these like walking stick type things but they were like these who knows who knows what they were but they they were look like grim reapers you know they look like reapers they just they were and they were grim and they were doing these you know these prayers and they were saying all this stuff and they were you know torturing him and stabbing him and fondling him and mutilating his genitals and you know and i'm over on the other side of the table being raped he's screaming i'm screaming i'm crying i can remember being five six years old saying what you guys are doing is wrong you know and and bleeding you know after they were done with me my mom took me back upstairs in my white t-shirt and i had a hard time climbing the stairs because i was bleeding down my legs um my back my vagina had been ripped and torn um so i was bleeding and she just made me change her bed and go lay down on the floor in a sleeping bag because there was nowhere for us to sleep so we slept on the floor in a sleeping bag and when they were done with him i heard him you know i just i just laid up there and cried you know hearing him being tortured down there and strapped to this table and then when he when they were done with him i um i had fallen asleep but i remember being woken up in the middle of the night to him and he crawled in my sleeping bag with me he said they tried to lock me outside like they left this little boy outside they were just gonna leave him out there and it was so cold up there in west virginia when he got into my sleeping bag he was freezing so we just snuggled uh in my sleeping bag for the rest of the night and just kind of like found that safe haven with each other and always have like such trauma bonding we've always had that but yeah i remember um you know seeing him strapped to the table you know with these like sim symbols and a circle drawn around them and candles lit and robes and black robes my mom used to wear a robe every once in a while we'd be taking alabama and other various state parks and properties where they you know they go out there to worship and to conjure up this you know this energy and the spirit and they're using you know drugs and like i said adrenochrome and you know harvesting it from children and using us and raping us and just who knows i i i i never liked it i always hated it i hated going to these fires the bonfires

over going to a bonfire and i was like you roll your eyes like i don't even want to go you know but they make you go and they make you participate and you know and then and like i said after being ritually abused like that it's just recovery after that i know i've needed you know needed stitches after that my brother actually they let him um even though he was very young they let him sew my vaginal walls back up that that particular time i was only five years old so he couldn't have been you know more than you know 15 but he he sutured me so they were letting him practice on me surgical suturing techniques and things like that also i mean he would use the cadavers when we went to the church and scientology and other other places but you know he practiced on meoh my gosh that's absolutely horrificand i mean he did it my whole life you know sewed me up um he knew field medics so anytime i needed stitches in the field he always had you know vials of things and as you know in a bag or he had you know suturing things where if he needed to get you know so something up in the field he could so yeah i mean that wasn't normal when when i needed him he was there and he he had what he needed um yeah he sewed me up from that and then we were brought back to florida you know so like i said there was a lot of things going on with my my parents were divorced so there's a lot of things my mom was taking us and using us for and selling us to people that my my dad didn't know about and then my dad you know was sneakily doing the same thing behind my mom's bag so it's like i was getting it you know everywhere i went when i went with my mom i would get it and then when i went with my dad i would get and they wouldn't communicate a lot of times they you know it took them 20 years to be in the same room they kind of acted like they hated each other for a long time and you know the only time i really ever saw him get along is when my sister had like open heart surgery and they had to be in the same room you know but other than that it took like 20 years for him to be in the same room wow you know without fighting or making you know rude remarks and whatever and so where does this leave you now i know people may ask you and i know i had it on my um list of things to ask you somebody commented and said how did she break free of all of this and i know that that's not that might be the perception but that's not necessarily um true and i wanted you to give an update on your current situation so people can better understand i don't think you're ever really free for a minute i think this is my life you know it's been my whole life um lived for other people's pleasures um but you don't you don't get away from it i'm trying you know i've left i've lost contact with a lot of them over the years but um even in more recent years i've

distanced myself from them all especially after the custody case i tried to keep in touch with with some of them um still but you know because i felt like i needed support but i never really got it from them um so i just distanced myself from them and you know anytime you do that they get suspicious and they get paranoid and they want to know what's going on and they want to know who you're talking to and then that's when the you know the uh you know common tactics of the cult i call it like start you know with the harassment and you know people really just trying to you know discredit you and harass you and and you know dismantle you and [___] you in various ways like through the courts like they're doing with me and you know by trying to say that i'm you know stalking now serving me stalking papers saying that i have this gun that i don't have calling animal control on my dog i mean this is kind of [___] they do um it's just ridiculous anything to harass you anything to try to cause you pain you know that's just how they are that's their nature i mean i've been around it my whole life and i just look at it like you know i can't let it bother me and i don't because i just i've been dealing with it my whole life so this is nothing new i know you don't talk to a lot of your family right now if you were to what would you say to them what would i say to my family yeah if they if you could what what message because i'm sure that they're probably even watching you like what do you want them to know that maybe they don't uh nothing nothing at all nothing i have nothing nothing to say to them i have nothing for them there's no love or affection there um there hasn't been for a long time i've been around them i've been nice to them i'm nice to their face i'm not a rude person to them um you know i know what they're capable of i know what they've done to me i know they've swept under the rug i know what they've participated in um and i have nothing nothing i can't even you know nothing i have nothing to say to them i have nothingnothing well based off what you've been through and what would you like is there anything that you would like people watching that aren't family members to know any messages for them before we log off for today or something that we didn't talk about yet uh i think that the truth will be known i think you know with more and more survivors speaking up about their experiences like you know in connecting the dots and all these familial ties and like you said there's the same stories being told by different people from around the world that have never met before and then when you start putting the pieces together and you start putting the ties together in the places and who owns them and the familial ties the corporation ties you know they're all tied together in some form or fashion so the truth will be known and you

know you know for anybody that wants to share it please do yeah there's a lot of people that you know don't want to hear it they don't want to listen to it they don't want to see it it's too grotesque it's too sad it's too hurtful and i understand that too but it's the truth and it will be known and it needs to be known you know so i'm making my truth known as well as others andyeah i think people are just gonna have to face that eventually you know what can people do people that are open to the truth and and they're listening and they're saying i believe this i believe these stories i know that this is happening what do people do what do we have to do as a society and what can people do in their own lives to contribute to a more positive feature that's devoid of this this system how do we break this i mean you start sharing it you keep sharing you keep sharing it i mean i think the truth for a lot of people when they hear it it resonates with them so you know when people hear somebody speak or talk or tell their story you can tell you know a lot of people are just you know intuitive like that and they you know they can they it resonates with them you know and that the truth resonates so when when something resonates with you you know kick it around with your friend share it with your friends and your family and just say look you know i mean just whatever resonates with you and not all i mean some of this stuff might be for a fetch but i'm telling you i grew up in packing houses i grew up in the fruit business around my dad and seeing the production you know like i said i've seen the entire operation from front to back um for most of my life so whatever resonates with you just you know keep digging you know and keep uh researching and keep sharing and kicking around and kicking around these things with your friends and family you know that because it really is simple right we do have to wake people up to what's happening in the world and that does come with being able to have the courage to have these conversations it's not easy you know it's not easy like i said i've been going through this stuff for a long time i've been discredited by my family for a long time i've been told to keep my mouth shut for a long time and you know it's time you know like i said not to be confused with time t-y-m-e is time over a long period of time you know it's just it's time it's time i couldn't agree more with you and for people who are listening i'm going to link it in the show notes but let people know where they can connect with you too uh just twitter i don't have any other social media or anything like that i don't really check any other emails or anything so just just twitter right now i was encouraged to do that a couple weeks ago and i mean so far it's going good so i'll just i'll keep that and if if anybody wants to follow me or you know research the stuff that's on my page or or look at

what's on there or hear the interview or reach out or have questions i can be reached on twitter and remind people of your handle that's i lack eyes my name backwards okay and i'm gonna link that in the show notes and it's on her past episode too and i encourage you guys to listen to that um the story is very complete between these two episodes i feel we covered a lot of information and i know it can be overwhelming to learn a lot of this but we do need to start having these conversations whether or not people want to believe that this is happening or whether or not people um want to face it or brush it to the side we have to have uncomfortable conversations about everything about child abuse about volunteers about politics about all of it and we have to stop each other and come together around these things and say hey i'm scared of this or it makes me uncomfortable but i need to learn it because i understand that it's happening and i'm complicit in silence which is also a choice um when i'm ignoring it or just pretending that it's not there and kaylie is very brave for coming on here and sharing all this she is as she says a targeted individual this she risks a lot coming on here and and telling all of this and in understanding that we also have to understand our due diligence in having the courage to listen and to share this information this episode all the episodes that that have been on this show all the stuff that people like kaylee are putting out there for you to go learn and dig into yourself um and kaylee thank you so much for being here again i appreciate you sharing and i've learned so much from you yeah absolutely no problem at all and for everybody listening thank you again like i said i i i knew kaylee's story was explosive personally but i was very overwhelmed with the agreements that all of you provided in confirming that and how many of you listened and tuned in and really uh blew up my youtube so thank you guys so much for that and and for contributing i hope that you guys do the same with this episode share it around listen to it again take notes if you need to and go research what she's saying you know we tend to ask questions of well do you have proof do you have this do you have that i know we all want that and so i encourage all of you to empower yourself with take some time and go through this interview again take some notes on some of the things that she said some of the names and go do some research yourself go on her twitter ask her more questions or ask her for a resource on where you can learn about this because it is really important that we all take charge of this and and stop waiting for somebody else to give us the answers or somebody else to do something we have to be that somebody that does something um please go follow our sponsor save our children podcast that's our sister podcast with becky and bridget my teammates in this

journey our podcasts go together and they offer information on the parenting side and then please follow hatchtruth on telegram which is also linked below um one of our sponsors they are just an incredible platform they reached out after seeing my podcast and said how can i help get this information out more i really believe in what you're doing and it meant a lot to me so i'd appreciate if you guys went and supported them follow kaylee on twitter please she dishes out a ton of information and you're gonna learn a lot um and just thank you guys so much for tuning in and for listening like i said it it means so much to me to see so many people caring so keeley thank you again for being here i really appreciate it thank you emma i appreciate what you're doing and i will see all of you guys next week so thank you guys again and we will have another episode next week and i appreciate you and we'll see you guys soon

Sayings

The truth will out, the truth will shout, the truth will set us free

"The only thing necessary for the triumph of evil is that good men do nothing" – Edmund Burke

"He who does not bellow the truth when he knows the truth makes himself the accomplice of liars and forgers." Charles Peguy

To sin by silence when we should protest makes cowards out of men – Ella Wheeler Wilcox

Every time we act in the face of fear, we dilute it's power and increase our confidence

Only the small secrets need to be protected, the large ones are kept secret by public incredulity – Marshall McLuhan

Let justice be done though the heavens fall – Fiat justitia ruat cælum

Put the enemy at unease by making information they do not want known to be known…

The individual is handicapped by coming face-to-face with a conspiracy so monstrous he cannot believe it exists. FBI Director J. Edgar Hoover

If you have found this post useful, please post on other social media – facebook, instagram, pinterest, gab, twitter, anonup, – whichever ones you are on. This is most helpful to spread the information. The people who do this are essential. Thankyou.

I am not connected to anyones Patreon accounts, nor do I receive any money for my writing. I believe it is important to provide this information not hidden behind paywalls, and yes I suffer financial hardship for doing so.

I will not commit suicide and if it appears I have, then people may judge for themselves why this is so, after blogging these exposes of the top level of these "orders". I do not wish to live in the kind of world that the psychopathic orders want to bring in, which is a world wholly and absolutely controlled by them. They commit horrific crimes of child rape, child torture, child cannibalism, child mind control and much more, which is why I wish to speak out and expose them. This carries some risk but if I am killed or go silent, my wish is for more people to tell the truth, they cannot kill us all… please set up your own blogs… replace me 100 fold…
